☐ **Public Health Risks of International Concern Found with Controls Measures Applied**
(Refer Annex 2 of International Health Regulation (2005) and Notify Navy and Marine Corps Public Health Center within 24 hours)

Notes:

1. Areas Inspected. Mark box if area inspected; leave box blank if not applicable or not inspected. For inspection findings which indicate a ship corrective action needed, provide recommendations along with Navy reference on comment page.

2. Evidence Found. Mark box if evidence exists of infection or contamination that may affect adversely the health of human populations, with an **emphasis** on those which may spread internationally or may present a serious and direct danger. Consider vectors in all stages of growth; animal reservoirs for vectors; rodents or other species that could carry human disease, microbiological, chemical, and other risks to human health; and signs of inadequate sanitary measures. Also consider any human cases that would be included in the Maritime Declaration of Health.
