BUMED NOTICE 5090

From: Chief, Bureau of Medicine and Surgery

Subj: ENVIRONMENTAL PROGRAM ROLES AND RESPONSIBILITIES

Ref: (a) OPNAVINST 5090.1D
     (b) OPNAV M-5090.1 of 10 Jan 2014
     (c) BUMED ltr 5090 Ser M41/16UM40171 of 21 Sep 2016 (NOTAL)

Encl: (1) Navy Medicine Activities Requiring an Environmental Program Manager
     (2) Sample Appointment Letter for Environmental Program Manager
     (3) Sample Appointment Letter for Environmental Points of Contact

1. **Purpose.** To establish interim Bureau of Medicine and Surgery (BUMED) guidance and direction for the designation and delineation of environmental program roles and responsibilities across the Navy Medicine (NAVMED) enterprise. This is a re-issue of this notice from 2016 with minor updates.

2. **Scope.** This notice applies to all shore-based NAVMED personnel at treatment, preventive medicine, education, training, and research and development activities. Shore-based NAVMED activities that are subordinate to the activities identified in enclosure (1), but are exclusively administrative in nature and have no responsibility over environmental aspects at their activities are excluded from these requirements; however, they must be identified to BUMED Headquarters as excluded by the appropriate echelon 3 environmental program manager (EPM).

3. **Definitions**

   a. **Environmental Management System (EMS).** A plan-do-check-act business model implemented at designated NAVMED activities per the requirements of references (a) and (b) and established by reference (b). The NAVMED-designated activities requiring implementation of an EMS are marked with an asterisk in enclosure (1).

   b. **Environmental Program.** A comprehensive program for managing all aspects of environmental compliance per Federal (e.g., Environmental Protection Agency), State, local, or applicable overseas regulations and policies. Depending on the site-specific operations and mission of an activity, the environmental program may encompass requirements including, but not limited to, the management of hazardous and regulated medical waste, drinking water testing and compliance, discharges to the sanitary sewer, management of fuel storage tanks, disposal of hazardous materials, compliance with air emissions standards, and implementation of an EMS.
c. **EPM.** A person appointed in writing by the activity commanding officer (CO) or officer in charge (OIC) who is assigned the responsibility to manage the environmental program at the activities identified in enclosure (1) or at the echelon 3 or headquarters levels of the organization. COs may elect to appoint the program manager as either a full-time or collateral duty, provided that the appointee is an environmental compliance technical subject matter expert (SME). General responsibilities and training required for an EPM are outlined in paragraph 5g of this notice.

d. **Environmental point of contact (POC).** A person appointed in writing, by the facility CO or OIC, who is assigned the responsibility to manage the environmental compliance requirements at an individual facility that is subordinate to the facilities identified in enclosure (1). This is typically a collateral duty position. While the appointee is not required to be an environmental compliance technical SME, the appointee is required to obtain the required training within 90 days of appointment. General responsibilities and training required for an environmental POC are outlined in paragraph 5h of this notice.

e. **Echelon 3 command.** The echelon 3 commands (i.e., NAVMED East, NAVMED West, and Navy Medicine Education, Training, and Logistics Command).

4. **Background**

a. Per references (a) and (b), BUMED has the responsibility to serve as the EPM for Budget Submitting Office (BSO) 18 for environmental program requirements associated with operations at NAVMED activities. To achieve the requirements of this responsibility, it is imperative that the BUMED environmental program be managed and resourced properly at each level of the enterprise. Properly appointed and trained personnel are critical to programmatic success and reduced risk of noncompliance.

b. For the scope of this notice, environmental responsibility will pertain to all chapters of reference (b) as applicable. Environmental program staff must be extra vigilant in the following compliance media areas: regulated medical waste, hazardous waste and hazardous material management, drinking water, waste water and storm water management, solid waste and pollution prevention, air quality, petroleum oils and lubricants, and spill prevention. BUMED designates these media areas for extra attention based on mission and past deficiencies identified during external environmental assessments.

c. Environmental management and compliance is a critical aspect of the NAVMED enterprise. There is a direct link between EMS, environmental compliance, staff and patient safety, and The Joint Commission or laboratory accreditations. Additionally, there is substantial risk associated with failing to manage environmental compliance requirements at any location. BUMED must identify and mitigate risk to our patients, visitors, and staff. Regulatory agencies may levy monetary fines and costly mandatory corrective actions upon activities and installations.
for poor performance and noncompliance. Such agencies may also deny environmental permits (e.g., permits for air emissions or hazardous waste storage), preventing or negatively impacting the operations of NAVMED commands, the host installation, or both.

d. Chapter 3, paragraphs 3-3.3, 3-3.4, and 3-3.6 of reference (b) outline the minimum general training criteria for Navy personnel with environmental duties, including collateral duties. Additional chapters within reference (b) outline training requirements for the management of specific environmental compliance media.

5. Action

a. Assistant Deputy Chief, Fleet Support and Logistics (BUMED-M4) must:

(1) Appoint in writing an EPM for BUMED. Appointee must be a technical SME in the environmental compliance field and must be the recognized authority and lead program manager for the BUMED area of responsibility (AOR).

(2) Receive annual metrics regarding environmental program performance and status.

(3) Provide environmental program direction and support to ensure the vision and priorities of BUMED senior leadership are reflected in programmatic strategies and goals.

(4) Coordinate with Assistant Deputy Chief, Financial Management and Comptroller (BUMED-M8) to ensure the environmental program has sufficient funding to plan and execute programmatic requirements including, but not limited to, travel for technical assist visits and environmental audits.

b. BUMED EPM must:

(1) Report directly to Director, Facilities (BUMED-M41) and oversee the environmental program per Department of Defense (DoD), Department of the Navy (DON), Defense Health Agency (DHA), and BUMED guidance.

(2) Coordinate and respond to DoD, DON, DHA, and the Office of the Chief of Naval Operations (OPNAV) environmental program data calls.

(3) Develop and maintain environmental program policies for BUMED.

(4) Ensure environmental program has sufficient funding to plan and execute programmatic requirements including, but not limited to, travel for technical assist visits and environmental audits. Additionally, collaborate with BUMED-M8 to ensure proper budgetary planning and data call responses for DoD, DON, and DHA.
(5) Oversee and execute an environmental audit program per OPNAV.

(6) Coordinate closely with NAVMED echelon 3 EPMs as well as with other BUMED codes on matters pertaining to BUMED environmental management to foster an open and collaborative culture in the program.

(7) Advocate for BUMED interests among OPNAV; Assistant Secretary of the Navy (Energy, Installations and Environment); Secretary of Defense; DHA; Naval Facilities Engineering Command; Commander, Naval Installations Command; and other environmental program stakeholders.

c. NAVMED Echelon 3 Commanders must:

(1) Appoint in writing a NAVMED echelon 3 EPM. Appointee must be an environmental compliance technical SME and must be the recognized authority and lead program manager for the command’s AOR.

(2) Provide environmental program direction and support to ensure the vision and priorities of BUMED and NAVMED echelon 3 senior leadership are reflected in programmatic strategies and goals.

(3) Ensure NAVMED echelon 3 EPM has sufficient funding and resources to plan and execute training, professional licensure, travel for technical assist visits, environmental auditing, and other requirements as applicable.

d. NAVMED Echelon 3 EPM must:

(1) Oversee all programmatic actions at the echelon 3 level, including frequent communication and coordination with echelon 3 leadership, the BUMED EPM, activity EPMs, activity environmental POCs, and other stakeholders.

(2) Serve as the principal consultant within the echelon 3 AOR for the management of the environmental program, including environmental compliance and EMS technical assistance and guidance to subordinate activities.

(3) Liaise and coordinate environmental programmatic data calls between BUMED and subordinate activities. Provide programmatic and technical updates and data call responses to the BUMED EPM.

(4) Review and consolidate funding requests during the annual budget data call and coordinate the information submitted to BUMED with the echelon 3 comptroller.

(5) Monitor activity execution of funds on a quarterly basis to ensure appropriate execution and provide this information to BUMED EPM.
(6) Participate in external environmental audits at subordinate activities as required by
OPNAV and scheduled by BUMED.

(7) Routinely visit subordinate activities to perform the following duties: provide
technical assistance, support program status, provide training, and work with new EPMs.

(8) Review and monitor progress of activity-submitted plan of action and milestones
(POA&M) for corrective actions associated with deficiencies (e.g., compliance, EMS, or
financial).

(9) Monitor instances of environmental-related visits by external parties (e.g., Federal or
State regulatory agencies) to subordinate activities, and share results and follow-up actions with
chain of command and BUMED EPM. Ensure situation reports (SITREP) are prepared by
activities and submitted as required by reference (c) or higher level guidance.

(10) Provide expert guidance on environmental matters, including the National
Environmental Policy Act, during the planning and development of facilities projects and
equipment procurement or disposal.

e. COs or OICs at NAVMED activities requiring an EPM per enclosure (1) must:

(1) Appoint in writing an activity EPM based on the definition provided in paragraph 3c
of this notice.

(2) Ensure subordinate commands have assigned an environmental POC in writing. The
subordinate command will assign an environmental POC based on the definition in paragraph 3d
of this notice.

(3) Ensure the NAVMED echelon 3 EPM is provided contact information for the activity
EPM and subordinate command environmental POCs.

(4) Ensure the EPM has successfully completed required environmental training
identified in paragraph 5g of this notice.

(5) Ensure compliance with applicable environmental requirements.

(6) Ensure execution of environmental program requirements is coordinated with your
host installation environmental program staff, per reference (b).

(7) Ensure annual self-assessments and management reviews are conducted and POA&M
for corrective actions are completed at NAVMED activities requiring an EMS, identified by an
asterisk in enclosure (1), per reference (b).
f. COs or OICs at NAVMED activities subordinate to activities listed in enclosure (1) must:

1. Appoint an environmental POC in writing based on the definition in paragraph 3d of this notice.

2. Ensure the activity EPM is provided contact information for the environmental POC at the subordinate command.

3. Ensure environmental POC has successfully completed required environmental training identified in paragraph 5h of this notice.

4. Ensure compliance with applicable environmental requirements.

5. Ensure execution of environmental program requirements is coordinated with your host installation environmental program staff, per reference (b).

g. Activity EPM must:

1. Be appointed in writing by the CO or OIC using the sample letter in enclosure (2) of this notice.

2. Complete the following training as soon as practicable upon assuming the assignment, per regulatory requirements, but within 1 year of appointment. Ensure records are kept per applicable regulations per paragraph 7 of this notice, or at least for the entirety of appointment as the EPM, whichever is later. Required training varies based on facility-specific requirements. A large number of the training courses are offered at no-cost through the Civil Engineer Corps Officer School (CECOS).

   a. Training required by media-specific regulation or reference (b) (e.g., for hazardous waste and medical waste management). Examples include, but are not limited to:

   2. OSHA Hazardous Waste Operations and Emergency Response Standard and annual refresher (29 CFR Part 1910.120(e)).

   3. Introduction to Hazardous Waste Generation and Handling (CECOS course number A-493-0080) or Overseas Hazardous Waste Generator (A-493-0094), as applicable.

   4. EMS General Awareness Training (provided by the local command per reference (b).
(b) EPMs at activities required to implement an EMS as part of their environmental program (as identified by an asterisk in enclosure (1)) must maintain the EMS per reference (b), and must take the following CECOS courses or equivalents:

1. Advancing an Effective EMS (A-4A-0098).
2. Integrated EMS and Compliance Auditing (A-4A-0079).

(c) The following CECOS courses or equivalent are optional for the activity EPM, but they are highly recommended.

(3) Maintain, manage, and report environmental data metrics to include hazardous waste, regulated medical waste, solid waste, recycling efforts, assessment deficiency close-out, financial execution, etc., and provide such information upon request.

(4) Respond to environmental program data calls as required.

(5) Oversee environmental compliance operations at the activity, including coordination with host installation environmental department staff and maintenance of pertinent copies of all contracts, service agreements, memorandum of agreements, and memorandum of understanding affecting the environmental program.

(6) Audit parent and subordinate commands annually at a minimum.

(7) Initiate environmentally-related SITREPs for parent and subordinate commands as required by reference (c) or higher level guidance. Provide SITREP to the echelon 3 EPM.

(8) Provide technical support, assistance, and guidance for environmental compliance activities at the subordinate commands including, but not limited to, annual visits and assessments of subordinate commands to evaluate compliance posture, provide support, communication of environmental compliance requirements, conduct training as necessary, and support the preparation and submission of annual budget requests, as well as development of requests for technical support projects.

(9) Provide data for the annual budget data call and ensure execution of funds is occurring properly at activity and subordinate commands.

(10) Ensure POA&Ms for external environmental audits are managed within the EMSWeb tracking system and quarterly updates are included as milestones within each
POA&M for NAVMED echelon 3 EPM review. The EPM is responsible for ensuring POA&M development and completion for external environmental audits at both the activity and subordinate commands. The EMSWeb tracking system is available at: https://emsweb2.cnic.navy.mil.

(11) Coordinate throughout the activity to ensure special program areas typically overseen by other departments, such as safety or industrial hygiene, are appropriately covered with respect to environmental aspects. Examples include, but are not limited to, hazardous material management, spill response planning and management, and storage tank management.

(12) Maintain a copy of required environmental permits, contracts, inspections, and any memorandum of understanding or memorandum of agreements with the host installation environmental department at activity and subordinate commands. These documents will be shared with the respective NAVMED echelon 3 EPM.

h. Environmental POC must:

(1) Be appointed in writing by the CO or OIC based on the sample letter provided in enclosure (3) of this notice.

(2) Complete the following training as soon as practicable upon assuming the assignment, per regulatory requirements, but within 1 year of appointment. Ensure records are kept per applicable regulations, but at least for the entirety of appointment as the environmental POC. Required training varies based on facility-specific requirements. Examples include, but are not limited to:

(b) Introduction to Hazardous Waste Generation and Handling (A-493-0080) or Overseas Hazardous Waste Generator (A-493-0094), as applicable.

(c) EMS General Awareness Training (provided by the local command per reference (b)).

1. Coordinate with EPM for requirements including, but not limited to, communication of environmental compliance requirements, external regulatory agency or host installation inspections and subsequent results, submittal of budget and environmental program requirement requests, response to data calls, maintenance and submittal of environmental metrics, and other programmatic requirements.

2. Oversee daily environmental compliance operations, including coordination with host installation environmental department staff.
6. Reporting

   a. The activity EPM must forward the name and contact information, as well as a copy of
      the signed appointment letter, to the NAVMED echelon 3 EPM within 30 days of a designation
      change for the EPM or environmental POC.

   b. The NAVMED echelon 3 EPM must forward the updated information from paragraph 6a
      to the BUMED EPM within 15 calendar days of learning of a designation change.

7. Records Management. Records created as a result of this instruction must be managed per
   SECNAV M-5210.1 of January 2012.

8. Information Management Control. The reports required in this notice are exempt from
   reports control per SECNAV M-5214.1 of December 2005, part IV, paragraph 7j.

From: Commanding Officer, Naval Hospital XXXXXX
To: I. M. Environmental

Subj: APPOINTMENT AS THE ENVIRONMENTAL PROGRAM MANAGER, NAVAL HOSPITAL XXXXXX

Ref: (a) BUMEDNOTE 5090 of 12 Sep 2017
     (b) OPNAVINST 5090.1D
     (c) OPNAV M-5090.1 of 10 Jan 2014

1. You are hereby appointed as the environmental program manager for Naval Hospital XXXXXX. In this role, you are responsible for management of the Naval Hospital XXXXXX environmental program as defined in reference (a) in coordination with the Naval Station XXXXXX environmental program staff. You are also responsible for providing oversight, support, and assistance regarding the management of the environmental programs at all Naval Hospital XXXXXX subordinate commands.

2. To fulfill this responsibility, you are required to familiarize yourself with the duties and responsibilities as they are listed in references (a) through (c), and obtain all training requirements as specified therein.

3. At any time you anticipate a change in your availability for responsibilities of this appointment, you must notify the commanding officer at your earliest opportunity via your chain of command.

A. B. COMMANDER
