(2) Diagnosis/Diagnoses Coding Instructions
(3) Duty Station Codes
(4) Preparation and Submission of Coded Medical Board (Card Format) Records - Medical Board Data System - 1 March 1984

1. Purpose. To provide coding and submission instructions for the first and second carbon copies of the Medical Board Report Cover Sheet, NAVMED 6100/1 (Rev. 10-83).

2. Cancellation. BUMED Instruction 6100.5A and the 1-80 edition of NAVMED 6100/1.

3. Background. A revised system for coding medical board information is hereby instituted by enclosures (1), (2), (3), and (4). For use herewith, a revised Medical Board Report Cover Sheet has been developed and instructions for completion of items 1 through 26 thereon are included in reference (a). The revised forms are now in the Navy Supply System and an initial distribution has been made by the Commander, Naval Medical Command, Washington, DC (COM NAVMEDCOM). These changes, together with a need for other refinements, have necessitated a major revision to data processing procedures supporting the subject system. Major changes herein are:

a. Inclusion of the provisions of chapter 14 of the Naval Medical Data Services Handbook.

b. Inclusion of instructions for the completion of cards 1 and 2 (an overlay on the lower half of the first and second carbon copies) of the revised Medical Board Report Cover Sheet.

4. Action

a. Medical Board Convening Activities. Activities designated by reference (a) with medical board convening authority are responsible for the following actions.

(1) Coding of the statistical coding sheet portion of the first and second carbon copies of the NAVMED 6100/1 (the lower half) in accordance with enclosures (1), (2), and (3).

(2) Accumulating and arranging in alphabetical sequence by last name of the member, the coded first carbon copy of NAVMED 6100/1's and submission thereof for processing to the Naval Medical Regional Data Center (NMRDC) assigned in subparagraph 2a(1)(c) of enclosure (1). Submissions must be made once each month and must be forwarded to reach the NMRDC by the 12th calendar day of the month following the month being reported.

(a) The officer charged with supervision of patient affairs functions is responsible for accurate coding and timely submission of NAVMED 6100/1's. Local procedures must be established to ensure that a record of all medical boards convened during the month are included.

(b) Negative reports for those months in which no medical boards are convened must be forwarded by memoranda to the appropriate NMRDC with a copy to the Commanding Officer, Naval Medical Data Services Center (NAVMEDATASERVCEN), Bethesda, MD 20814.

(3) Completion of fields 65 through 70 of the second carbon copy of the NAVMED 6100/1 and submission to the assigned NMRDC upon return to full duty of members. Local procedures must be established to ensure that all "reevaluations" and "returns to full duty" during the month are included.

(4) Initial reporting under this instruction shall be for medical boards convened during the month of April 1984. Batched documents for April 1984 must be sent to reach appropriate NMRDCs by 21 May 1984. Processing of medical board reports for boards convened before 1 April 1984 shall be in accordance with the instructions in effect at the time of convening of the board.

(5) Retaining information on medical boards for a minimum of 24 months.

b. Naval Medical Regional Data Centers

(1) In accordance with enclosure (4), process all NAVMED 6100/1's before submission of completed reports to NAVMEDATASERVCEN, Bethesda, MD 20814.

(2) Keypunched medical board (card format) records must be retained by NMRDCs for 12 months to facilitate edit and correction procedures.

5. Forms and Reports

a. The Medical Board Report Cover Sheet, NAVMED 6100/1 (Rev. 1-80), becomes obsolete for medical boards convened after 1 April 1984. Stocks shall be used only for completion of medical boards convened prior to the 1 April 1984 implementation date of this instruction.

b. The Medical Board Report Cover Sheet, NAVMED 6100/1 (Rev. 10-83), is available from Cognizance Symbol '1I' stockpoints of the Navy Supply System under stock number 0105-LF-206-1006. Report symbol MED 6100-1 is assigned to this report. This reporting requirement has been approved by the Commander, Naval Medical Command for 3 years only from the date of this instruction.

# CODING INSTRUCTIONS FOR MEDICAL BOARD REPORT COVER SHEET, NAVMED 6100/1 (Rev. 10-83)

1. Purpose. To provide instructions for coding medical board data on the statistical coding sheets (second and third pages, lower half) of NAVMED 6100/1 that are recorded in narrative form in items 1 through 20. Submission to NMRDCs must be made in accordance with paragraph 4a(2) of the basic instruction. Data elements, applicable coding spaces, item numbers (if applicable) on the NAVMED 6100/1 from which information is derived, and instructions or references for coding follow. Information must be coded on both statistical coding sheets in accordance with the following.

2. Instructions. Statistical coding sheets 1 and 2 do not have carbon between them. Before coding, these sheets must be removed from the packet and coded independently.

a. Card Type 9, Card No. 1. Coding spaces 01 and 02 are precoded as '9' and '1' respectively.

(1) Reporting Facility UIC. Coding spaces 03 through 07 must contain the appropriate facility UIC (Unit Identification Code) in subparagraph (c) below. On second limited duty codings, retain the UIC of the original reporting facility.

(a) Designation of Naval Medical Regional Data Centers (NMRDCs). Medical board facilities falling within the purview of this instruction are assigned to NMRDCs as indicated in subparagraph (c) below for the purpose of machine processing Medical Board Report Cover Sheets. Properly completed and coded data documents must be forwarded to the assigned NMRDC in accordance with paragraph 4a(2) of the basic instruction.

(b) Naval Facilities Conducting Medical Boards. Naval facilities conducting medical boards must prepare reports using the specific reporting facility UIC in (c) below. The receiving NMRDC to which such naval facilities are assigned must process submitted data in accordance with enclosure (4). Completed work for each individual medical board facility must be forwarded to NAVMEDATASERVCEN, Bethesda, MD 20814.

(2) Social Security Number. Coding spaces 08 through 16 must contain the nine-digit social security number of the member as recorded in item 4. Do not include dashes between the numbers.

(3) Name. Coding spaces 17 through 30 must contain the member's name as recorded in item 2, (or as much of the last name as possible). Coding spaces 17 and 18 must not be blank. To the extent available, enter last name and as much of the first name as possible, leaving a space between last and first name; or last name, first name, and as much of the middle name as possible, with a space between each. Do not use commas or apostrophes in coding names, and do not leave space where an apostrophe or dash appears in a name such as "Van-Smith". Following are examples of appropriate coding:

| Name | Coded Name |
|---|---|
| HOLLINGSWORTH, SCOTT W. | = HOLLINGSWORTH |
| VAN-SMITH, WILLIAM | = VANSMITH WILLI |
| BILLINGS, JOHN | = BILLINGS JOHN |
| WEAVER, JAMES ALLEN | = WEAVER JAMES A |
| JONES, JOHN WALTER | = JONES JOHN WAL |
| LEE, JOHN ANDY | = LEE JOHN ANDY |

(4) Duty Station. For initial medical boards, coding spaces 31 through 37 must contain the five-digit Unit Identification Code (UIC) and the two-digit location code (composition as directed in enclosure (3)) of the member's duty station at the time the injury or disease was incurred. Coding spaces 31 through 37 for second and subsequent medical boards for the same condition must also contain the UIC and location code of the member's duty station at the time of injury or illness necessitating the original board. Example: a member is injured while assigned to ship company on an aircraft carrier and is transferred to temporary additional duty under treatment to Naval Hospital (NH), Jacksonville, FL. The member's UIC and location code would be that of the aircraft carrier vice the UIC and location code of NH Jacksonville, FL. Should this member be granted 6 months limited duty on release from hospitalization and assigned to Naval Air Station (NAS), Jacksonville, FL for the limited duty period, the reevaluation coding must continue to list the UIC and location code of the aircraft carrier. Do not code for other than active duty Navy and Marine Corps members.

(5) Sex. Coding space 38 must contain the appropriate code of the member's sex as recorded in item 5a: M = Male or F = Female.

(6) Race. Coding space 39 must contain the appropriate code applicable to the member as recorded in item 5b: C = Caucasian, N = Negroid, G = Mongolian, I = American Indian, or M = Malayan.

(7) Date of Birth. Coding spaces 40 through 45 must contain the member's numerical two-digit code for each of the following as recorded in item 6: YY = year, MM = month, and DD = day of month of birth, e.g., 380629 = 29 June 1938.

(8) Length of Service. Coding spaces 46 through 49 must contain:

(a) Spaces 46 and 47 - The numeric two-digit number for full years of service as recorded in item 7. If length of service is less than 1 year, spaces 46 and 47 must be coded with numeric zeros. If less than 10 years, a numeric zero must be placed in space 46.

(b) Spaces 48 and 49 - The numeric two-digit number of full months of service as recorded in item 7. Spaces 48 and 49 must be coded with a value of '01' through '11'.

(9) Pay Grade. Coding spaces 50 and 51 must contain one of the following codes applicable to the grade or rate abbreviation of the member as recorded in item 8. The coding shall be determined from the pay grade of the member:

| Pay Grade | Code |
|---|---|
| **Commissioned Officers** | |
| O-11 | 11 |
| O-10 | 10 |
| O-9 | 09 |
| O-8 | 08 |
| O-7 | 07 |
| O-6 | 06 |
| O-5 | 05 |
| O-4 | 04 |
| O-3 | 03 |
| O-2 | 02 |
| O-1 | 01 |
| **Warrant Officers** | |
| W-4 | W4 |
| W-3 | W3 |
| W-2 | W2 |
| W-1 | W1 |
| **Enlisted** | |

| E-2 | E2 |
| E-1 | E1 |
| **Cadets/Midshipmen** | |
| C-1 (Aviation Cadet) | C1 |
| M-1 (Academy Cadet/Midshipman) | M1 |

(10) Designator/Rate/MOS. Coding spaces 52 and 53 must contain the appropriate of the following for the member as recorded in item 8:

(a) Navy Enlisted. Enter the first 2 alpha digits of the rate abbreviation recorded in item 8 under grade/rate.

(b) Navy and Marine Corps Officers and Marine Corps Enlisted. Enter the first two digits of the numeric code recorded in item 8 under DESIG/MOS.

(c) All Other Service Members. Do not code.

(11) Cause of Injury. Coding space 54 must contain one of the following one-digit numeric codes applicable to cause of injury recorded in item 9:

| Code | Cause |
|---|---|
| 1 | Battle Casualty |
| 2 | Motor Vehicle |
| 3 | Falls |
| 4 | Athletics or Sports |
| 5 | Assault by Another |
| 6 | Self-inflicted |
| 7 | Other External Cause |
| 9 | Not Applicable |

(12) Military Theater of Operation. Coding spaces 55 and 56 must contain a code applicable to the member and are subject to change by COMNAVMEDCOM. Presently, the following codes are applicable to the respective theaters:

| Code | Theater |
|---|---|
| A1 | Lebanon, Hostile |
| A2 | Lebanon, Non-Hostile |
| B1 | Grenada, Hostile |
| B2 | Grenada, Non-Hostile |
| 99 | Not Applicable |

(13) Status. Coding space 57 must contain the one-digit numeric code applicable to the member's status as recorded in item 11.

(14) EAOS (End of Active Obligated Service). Coding spaces 58 through 63 must contain the date, recorded in item 13, of the member's end of active obligated service as follows: YY = year, MM = month, and DD = day of the month, e.g., 860430 = 30 April 1986. For augmented officers, leave coding spaces 58 through 63 blank.

(15) Admitted Sicklist. Coding space 64 must contain a 'Y' for "yes" if the member was admitted to the sicklist or an 'N' for "no" if not admitted to the sicklist (item 14a).

(16) Date of Board. Coding spaces 65 and 66 must contain the last two digits of the calendar year and spaces 67 and 68 the numerical number of the month of the year in item 15 that the board was recorded, e.g., 8401 = January 1984.

(17) LOD Investigation (Line of Duty Investigation). Coding space 69 must contain a 'Y' for "yes" if there was an LOD investigation or an 'N' for "no" if one was not performed (item 17).

(18) Disciplinary Action Pending. Coding space 70 must contain a 'Y' for "yes" if disciplinary action is pending or an 'N' for "no" if none is pending (item 18).

(19) Indicated Disposition. Coding space 71 must contain the one-digit numeric code ('1' through '8') recorded in item 20.

(20) Period. If the indicated disposition is "limited duty", coding space 72 must contain a '1' to indicate an initial period of limited duty or a '2' to indicate a second period. If limited duty is not the indicated disposition, coding space 72 must contain a '9'.

b. Card Type 9, Card No. 2. Coding spaces 01 and 02 are precoded as '9' and '2' respectively.

(1) Reporting Facility UIC. Coding spaces 03 through 07 must be coded the same as on Card No. 1 (paragraph 2a(1) above refers).

(2) Social Security Number. Coding spaces 8 through 16 must contain the nine-digit social security number of the member as recorded in item 4. Do not include dashes between the numbers.

(3) Limited Duty Automatically Expires. Coding spaces 17 through 22 must contain the numerical two-digit codes for: YY = year, MM = month, and DD = day of month the granted limited duty period automatically expires: e.g., 841108 = 8 November 1984. If this field is coded, coding space 71 (Indicated Disposition) must contain a '6' or '7'.

(a) The revised system will not accept a medical board record with the same reporting facility, SSN, name, and a later board date if a record with an earlier board date exists on the limited duty file. Limited duty records must be reconciled first. A record will remain on the limited duty file if the procedures below are not followed.

1 Only two circumstances will actuate removal of a medical board record from the limited duty file: 'date fit for duty' being coded or a change in indicated disposition other than a second period of limited duty.

a Date fit for duty must be associated with a change in indicated disposition to a '5'. Prior to the expiration

of the first period of limited duty, NAVMEDATASERVCEN must be notified by the reporting facility as to the disposition of a medical board by submitting, via SOP for data submission, a duplicate of the record submitted for the first period of limited duty with a change in indicated disposition.

b If the change in indicated disposition is 'full duty' (coded as a '5'), a 'date fit for full duty' must also be coded. For an authorized second period of limited duty, the reporting facility must submit, via standard operating procedures (SOP) for data submission, a duplicate of the record submitted for the first period of limited duty with the exception of: indicated disposition (which will change to '7'), period (which will change to '2'), and a new "limited duty automatically expires" date. Prior to the expiration of the second period of limited duty, the reporting facility must submit to NAVMEDATASERVCEN a duplicate of the record submitted for the second period of limited duty with a change in indicated disposition. If this change is "full duty" (coded as a '5'), a "date fit for full duty" must also be coded.

2 When reboarding an individual who is already in a limited duty status, the prior board must be completed. The use of a final indicated disposition of "Departmental Review" (coded as an '8') will cause removal of the current board from limited duty status.

(b) One of the objectives of the revised system is to eliminate multiple records for the same medical board. Records submitted in accordance with the procedures outlined in subparagraph (a) above will cause removal of a record from limited duty status.

(4) Diagnosis/EPTE

(a) General. In using the International Classification of Diseases, Ninth Edition (ICD-9), it is rarely sufficient merely to locate the lead term in the alphabetical index, volume 2, and to assign the code number shown. It is important to read all of the terms enclosed in parentheses and all sublistings under the lead term before selecting the appropriate code. Reference should be made to the tabular list in volume 1 to verify the appropriateness of the coding assignment. It is important to read and be guided by the inclusion and exclusion notes for the particular code, the category code, and section titles. Enclosure (2) contains additional specific instructions.

(b) Primary. Coding spaces 23 through 28 must contain the primary diagnosis indicated in item 19a coded in accordance with both volumes 1 and 2 of ICD-9. Coding space 29 must contain code '1', '2', or '3' applicable to the primary diagnosis in item 19A and taken directly from the "EPTE" box within that item.

(c) Second, Third, Etc. Coding spaces 30 through 64 must contain codes for the second, and if applicable, through the sixth diagnosis coded in accordance with subparagraph (b) above, including an EPTE code for each diagnosis. These coding spaces must be coded sequentially, i.e., do not skip over coding areas for diagnosis/EPTE if multiple diagnoses are to be coded. See reference (a), art. 18-26 on recording diagnoses sequentially.

(d) Inappropriate Use. The following diagnoses (or variations thereof) must not be used:

1 7600-7799 - Certain causes of perinatal morbidity.

2 V010-V829 - Special conditions & examinations without sickness.

The use of such codes is not definitive. "V" codes are used only as a supplementary code and may not be used in primary, single cause tabulations. Examples of the above codes would include 1 a personal history of certain diseases, and 2 a person with an artificial heart valve in situ.

(5) Date Fit For Full Duty. Coding spaces 65 through 70 must contain the numeric two-digit codes for the calendar year, month, and day of the month that a member is expected to be fit for full duty, e.g., 850507 = 7 May 1985. When a member is found fit for full duty after a period of limited duty, coding spaces 65 through 70 must be completed in card 2 and coding space 71 in card 1 (Indicated Disposition) must also be recoded as a '5'. Forward both card 1 and card 2 to the appropriate NMRDC.

(6) Untitled Spaces. Coding spaces 71 through 80 must contain the member's name as recorded in item 2, (or as much of the last name as possible). To the extent available, enter last name and as much of the first name as possible, leaving a space between last and first name; or enter last name, first name, and as much of the middle name as possible, with a space between each. Do not use commas or apostrophes in coding names, and do not leave space where an apostrophe or dash appears in a name such as "Van-Smith". Following are examples of appropriate coding for spaces 71 through 80:

| Name | Coded Name |
|---|---|
| HOLLINGSWORTH, SCOTT W. | = HOLLINGSWO |
| VAN-SMITH, WILLIAM | = VANSMITH W |
| BILLINGS, JOHN | = BILLINGS J |
| WEAVER, JAMES ALLEN | = WEAVER JAM |
| JONES, JOHN WALTER | = JONES JOHN |
| LEE, JOHN ANDY | = LEE JOHN A |

# DIAGNOSIS/DIAGNOSES CODING INSTRUCTIONS

1. Coding Diagnoses. The International Classification of Diseases, Ninth Edition (ICD-9), volumes 1 and 2, must be used to code diagnosis. Before using:

a. Make deletions and post changes and additions listed in section XVI of reference (c) and World Health Organization (WHO) errata and addendum sheets.

b. Read the information on punctuation marks, abbreviations, and the dual classification concept, volume 1, pages XXV-XXX.

c. Read the instructions related to the structure of the index and the explanation of the convention, volume 2, pages VII-XII.

2. Basic Rules

a. Use the Alphabetical Index (ICD-9, volume 2) to locate the condition or disease (not anatomical site).

b. After the term is located in the Alphabetical Index, read and be guided by the following:

(1) The hyphenated indentations for appropriate subterms.

(2) Any notes that appear under the main disease entry or subheadings in the Index.

(3) The terms enclosed in parentheses following the main term as well as all subterms under the main term before selecting the appropriate code.

(4) The "see" and "see also" on cross-referencing to synonyms and closely related terms.

c. Verify the tentative code by referring to the Tabular List (ICD-9, volume 1). It is important to read and be guided by the list of inclusions, exclusions, and other instructions and footnotes under the selected code.

(1) Fourth-digit subdivision codes must be used when provided, e.g., chapter XVII, Injuries. The meaning of the fourth digit varies for different injury diagnoses.

(2) Fifth-digit subclassification codes are to be used where indicated in volume 1 of ICD-9, including DOD modifications as indicated in reference (c); e.g., pyogenic arthritis of knee - code 71106 (see pages 395 and 396 of volume 1).

(3) If the diagnosis code does not contain five digits, numeric zeros must be used to fill digits to the right, i.e., add as many zeros as necessary to make a five-digit code. Example: the code for pneumococcal pneumonia 481 should be coded as 48100. Do not use the decimal point shown in ICD-9. Thus, 540.9 must be coded as 54090. Note: See subparagraph (4) below in the use of the sixth position, spaces 28, 35, 42, 49, 56, and 63 on NAVMED 6100/1.

(4) Sixth position of a diagnosis code is used to identify:

(a) Diagnosis codes marked with the dagger (+). Do not use the dagger, instead, place the capital letter 'D' in the sixth position of the diagnosis code; e.g., 016.2+ must be coded as 01620D.

(b) Diagnoses codes marked with the asterisk (*). Do not use the asterisk, instead place the capital letter 'A' in the sixth position of the diagnosis code; e.g., 711.6* must be coded as 71160A.

(c) Secondary codes are used to identify 1 specific sites in cases of multiple injuries and 2 specific drugs which are recorded in addition to the principal drug in polydrug users. Place the capital letter "S" in the sixth position of the diagnosis code (see section XVI of reference (c)); e.g., 304.1A must be coded as 30410S. When the sixth position of the diagnosis code is not used, leave blank.

(d) Do not use "E" or "V" codes (pages 35 through 45 of ICD-9, volume 1).

(e) Use "R" codes for adverse effect to drugs in correct usage; e.g., Acebutolol used in the correct dosage with an adverse effect would be coded as R9413 (reference (c), section XVI, page XVI-48).

# DUTY STATION CODES

1. General. The duty station code is a seven-character numeric or numeric and alpha code used to identify the duty station of an active duty Navy or Marine Corps member. In addition to the five-digit Unit Identification Code (UIC), the duty station code identifies the type and location of the duty station by adding digits 6 and 7 to the duty station UIC. UICs are published in reference (b).

2. Facility Types

a. United States Duty Stations, Including Alaska and Hawaii. The following identifies the composition of duty station codes by locations, and in selected instances the type of facility. The code for ships attached to continental naval regions is discussed under subparagraph c below. Codes for U.S. duty stations consist of: the individual UIC of the duty station, digits 1 through 5; location, digit 6, always '1' denoting a United States location; and type of facility, digit 7, assigned in accordance with type facility code listed below:

FACILITY LOCATION CODE (DIGIT 6)

| Location | Code |
|---|---|
| United States | 1 |

FACILITY TYPE CODE (DIGIT 7)

| Facility Type | Code |
|---|---|
| NH | 1 |
| NS | 2 |
| NAS or MCAS | 3 |
| NTC or MCRD | 4 |
| Navy or Marine Corps School | 5 |
| NCS | 6 |

(1) REPORTING FACILITIES UNABLE TO UTILIZE THE STANDARD OPERATING PROCEDURES OUTLINED IN SUBPARAGRAGRAPH C ABOVE MUST NOTIFY THE CHIEF OF OPERATIONS AT NAVMEDATASERVCEN, AUTOVON 295-0829, THAT AN ALTERNATIVE SOP IS NEEDED FOR DATA SUBMISSION. SUCH FACILITIES SHALL BE ALLOWED TO SUBMIT TAPES VIA TWO ALTERNATIVE METHODS. ONE OF THE TWO METHODS MUST BE USED, PREFERABLY THE LABEL. IF THERE IS A DEVIATION FROM STANDARDS OR THE TAPE IS UNREADABLE, IT WILL NOT BE COPIED AND WILL BE RETURNED TO THE RESPECTIVE FACILITY LABELED AS 'UNKNOWN DATA' OR 'NONREADABLE'. MEDICAL BOARD TAPES BEING SENT TO NAVMEDATASERVCEN MUST CONTAIN CERTAIN ATTRIBUTES FOR COPYING PROCEDURES. MANDATORY ATTRIBUTES ARE:

9 TRACK  1600 BPI
ASCII FORMAT  NON-LABELED TAPES
RECORD SIZE = 80  BLOCKSIZE = 3120
THIS TAPE SHOULD HAVE ONLY ONE LEADING TAPE MARK.
