★ *we remember the USS Cole* ★

It has been 15 years since the USS Cole was bombed by terrorists in Yemen. On 12 October 2000, the USS Cole was docked in a harbor for a routine fuel stop when two suicide bombers in a small boat pulled along side and detonated 400 - 700 pounds of explosives. In the attack, 17 US Navy Sailors were killed and another 39 were injured.

As a part of the rescue, more than seven Navy ships, one Royal Navy ship, four Marine Corps and Air Force security force groups, and the partnership of a French military hospital immediately stepped in to help the injured and to assist the crew of the USS Cole with securing the area. Fifteen years after the attack, NMTSC remembers those lost and injured, and expresses thanks to all who provided aid.
