

Flu Vaccine Information

Naval Hospital Bremerton

Status For The Week of 27 October 2009

- **We are beginning the launching of our busiest ever flu vaccine program.**
- **This includes separate vaccinations for BOTH the regular SEASONAL Flu and H1N1.**
- **While our initial focus is on the Navy and CDC target groups (Active Duty and high risk patients), our ultimate target group is everyone who needs it and wants it.**
- **The bulk of our vaccine supplies are expected to arrive over the next several weeks. We will then aggressively announce the dates of our Flu Vaccine Clinic which will again take place at the Bremerton Health and Education Center on Bangor.**
- **Our Goals:**
 - 1. The DOD goal for Active Duty is 90% of vaccination by 1 December.**
 - 2. We hope to be able to offer both vaccines by National Influenza Vaccination Week, December 7-10 but, as noted on national news, we too are affected by the delay in vaccine from manufacturers.**

**Our most current Flu Vaccine information
is always available on our website**
