

Building 926 Renovation Completed

The building 926, Mainside Dental Clinic, across Franklin Avenue from the Hospital, has been undergoing renovation for past nine months. A 6.8 million dollar renovation and equipment update project is scheduled for completion in February 2015. The 16,000 square feet building will feature a state of the art Central Sterilization Room, modern clinic settings, and more open patient care areas for both Dental and Physical Therapy Clinics.

The last phase of this renovation involves moving the dental clinic from the relocatable trailers back to building 926, and the Physical Therapy Clinic to swap location with the Wellness Clinic. During this time, there will be a temporarily shift of all dental care to the Hornet Health Dental Clinic, on the Operations Side (ops-side) of the base. This is projected to be during the period of 02 to 13 February. Additionally, the Wellness Clinic and the Physical Therapy will have a brief interruption in services for a few days during the move.

On Tuesday, 17 February, building 926 will be opened for business with full array of dental and physical therapy services. The ribbon cutting date is to be determined. The Wellness Clinic will be located in the main hospital on the first deck near the east end of the building, at current Physical Therapy Clinic's location. Please note that Wellness Clinic will not change their phone number (559)998-2697. The Physical Therapy Clinic (559) 998-4460 and Dental Clinic (559)998-4220 phone numbers will remain the same too.
