## Multidisciplinary Care

Naval Medical Center Portsmouth combines the expertise and skills of thoracic surgeons, pulmonologists, gastroenterologists, medical and radiation oncologists, interventional radiologists, pathologists and a professional support staff into a program of comprehensive services for a multitude of thoracic conditions.

## State of the Art

We at the Naval Medical Center are committed to offering our patients the latest advances in their evaluation and care. Our patient outcomes meet or exceed national standards in all areas of thoracic surgery.

## Thoracic Surgical Services

- Thoracic Oncology—including comprehensive care for neoplasms of the lung/airways esophagus, thymus, and chest wall
- Evaluation and treatment for pneumothorax, hemothorax, pleural effusion, and empyema
- Repair of chest wall or diaphragm deformities and abnormalities
- Treatment of hyperhidrosis
- Diagnostic evaluation for lung nodules, idiopathic lung disease, and enlarged lymph nodes
- Treatment of gastroesophageal reflux, achalasia, and other benign esophageal conditions
- Video-Assisted (“VATS”) minimally invasive surgery
