Anthrax Vaccine Dosing

Basic vaccination series consists of 6 shots over 18 months, given as indicated above. The following intervals between doses must be maintained; the 2nd dose is given 2 weeks after the 1st dose; the 3rd dose is given 2 weeks after the 2nd dose; the 4th dose is given 5 months after the 3rd dose; the 5th dose is given 6 months after the 4th dose; and the 6th dose is given 6 months after the 5th dose. If one is late for a dose or strays from the established schedule, the next dose due should be given, with the intervals for the remaining doses maintained. A booster dose should be administered every 12 months. If an adverse reaction occurs following an anthrax vaccination, note in "comments" block above and on a SF 600. If a severe reaction occurs, further administration of anthrax vaccine should be discontinued.

Unless otherwise stated, the manufacturer of Anthrax Vaccine, Adsorbed, is BioPort Inc. (Formerly" Michigan Biologic Products Institute")

PATIENT'S IDENTIFICATION (For typed or written entries, give: Name- last, first, middle; ID No or SSN; Sex; DOB; Rank/Grade)
