

**DEPARTMENT OF OBSTETRICS AND GYNECOLOGY
NAVAL MEDICAL CENTER SAN DIEGO**

COMPREHENSIVE OBSTETRICS AND GYNECOLOGY (OBGYN)

Location: Clerkship will be served at Naval Medical Center, San Diego

Duration: 4 weeks

Clerkship Description: Students will spend approximately 50% of their clerkship on the routine obstetrics service and the remaining time on the gynecology service. Their teams will be made up of OBGYN residents at multiple levels of training and a board certified obstetrician/gynecologist. During this rotation, the students will participate in the care of patients in the inpatient and outpatient settings. Other opportunities for education include morning rounds, departmental conferences, specialty clinics, dedicated time in the OR and time on the Labor and Delivery Unit.

During the obstetrics portion of the rotation, the students will be able to assess and triage pregnant women, understand the normal course of labor, participate in vaginal and cesarean deliveries, identify abnormalities that develop during labor and care for postpartum women. While on the gynecology service, the students will evaluate women in clinic presenting for routine health maintenance and common gynecologic disorders. Additionally, they will be involved in the preoperative assessment, surgical procedure and post-operative care of women on the gynecology inpatient service.

The students will be expected to take OBGYN call approximately one night per week.
