GENERAL INFORMATION

Branch Dental Clinic Naval Base San Diego (BDC NBSD) is located in Building 3230 onboard 32nd Street Naval Base San Diego. Directions to BDC NBSD: Take Interstate 5 South and exit on Main Street and National City Boulevard. Go straight through the intersection to Naval Station Gate #30. Turn right on Norman Scott Road. The Branch Dental Clinic (Building 3230) is the first building on the left-hand side. Arrangements will be made for course attendees to enter the base during the period of the course only. *Attendees utilizing base lodging* are reminded that vehicles must have a DoD decals or a base pass. Vehicles without decals must obtain one at the Pass and Decal Office, (619) 556-6218/1651, Building 128 on Harbor Drive between the hours of 0700-1630, Monday – Friday. Proof of insurance, car registration, current drivers' license and additional identification are **required** to obtain a pass. Parking is permitted in the main parking lot located in the front of BDC NAVBASE on Craven Street. This lot is shared by multiple commands and fills up early.

Parking in spaces designated for other commands or personnel is strictly prohibited.

Fax: Commercial (619) 556-9410

DSN 526-9410

Mailing Address:

Director for Dental Services

Branch Dental Clinic, Naval Base San Diego

2310 Craven Street

San Diego, CA 92136-5596

E-mail: charles.murphy@med.navy.mil

ELIGIBILITY

Participation is open to DoD active duty members of the Federal Dental Services, Reserves actively participating in the Reserve Program, U.S. Public Health Services dentists, and government employed dentists/hygienist. Participation for non-federal agency dentists is available on a space available basis. Courses may have special limitations.

COURSE FEES

Course enrollment fees are no longer required.

APPLICATION

Applications must be submitted in timely manner prior to each course to ensure seat reservation. **Due to quota limitations, attendance is not guaranteed unless a confirmation letter has been received .**

Applications are due no later than 30 days prior to the course convening date.

Active duty DoD members are given first priority for course enrollment.

Due to course limitations, non-federal agency dentists may apply up to two (2) courses per fiscal year.

ORDERS

All orders should read as follows: "Reporting Instructions: Report to Director, DDS, NMCSO, 2310 Craven Street, Naval Base, San Diego, CA 92136-5596" and "Government Messing Not Available" (**Officers Only**).

CHECK-IN PROCEDURE

All personnel are required to check in with Continuing Education at **0700 the first day of the course**. At that time all TAD orders will be collected. Uniform for Navy: winter blue, summer white, service khaki or the appropriate seasonal service dress uniform. For other services: Appropriate service equivalent. For civilians: Appropriate business attire.

ANNUAL TRAINING/ACTIVE DUTY TRAINING, NAVAL RESERVE

All Naval Reserve officers and enlisted personnel desiring a quota in a course **MUST** submit the course application form contained in this brochure through their respective Readiness Commands (REDCOM). This application must be received prior to the application cut-off date to ensure availability of a seat for the course requested. Annual Training or Active Duty Training orders should not be requested or processed until you have received written confirmation of a course quota. **Note: If you intend to combine a course with, or include it during, Annual Training, you must contact your respective REDCOM and the Reserve Liaison Office at Naval Dental Center Southwest, San Diego.** Approval from the Course Coordinator or Course Director for a course, does not include approval for Annual Training. **Plan ahead.** The Reserve Liaison Officer or the assistant may be reached by calling DSN 522-6838, Commercial (619) 532-6838.

CONTINUING EDUCATION CREDITS

Continuing Education Credits are given in accordance with the Academy of General Dentistry, the American Dental Association and the Dental Board of California. **The US Navy is an American Dental Association (ADA) Continuing Education Recognition Program Recognized Provider.**

DENTAL TREATMENT PLANNING FOR GENERAL DENTISTS

19-22 October 2009

Quota: 30

Course Data Processing Code:

887V-10010

Course Identification Number:

B-6C-1011

Director

CDR Joseph Molinaro, DC, USN, DMD, MS

Diplomate, American Board of General Dentistry

Master, Academy of General Dentistry

Director, Advanced Education in General Dentistry Program, BDC Naval Base, San Diego, CA

Eligibility Active Duty dentists only. (One week prior to the course start date government employed dentists can contact the continuing education office by telephone to determine if space is available for enrollment.)

Course Description This course is directed to the clinical general dentist and will provide a comprehensive overview and update of the major specialty areas. In some specialty areas, clinical techniques for general dentists will be reviewed in detail. In addition, overall current treatment philosophies will be discussed especially where current controversies exist. Anticipated specialty areas of coverage: Operative Dentistry, Esthetics, Occlusion, Fixed and Removable Prosthodontics, Implantology, Dental Materials, Oral Surgery, Periodontics, Endodontics, Orthodontics, Oral Medicine/Oral Pathology and Orofacial Pain. The course is divided into both lecture and participation. The lectures will review current preventive, diagnostic, restorative techniques and materials and their impact on the treatment planning process. The second part allows groups of participants to develop, present and discuss treatment plans as a group for selected cases requiring a multidisciplinary approach.

Anticipated Learning Outcomes

- Discuss the newer technologies, equipment and instrumentation in various specialty areas.
- Describe the newer available materials in the dental products market.
- Describe appropriate clinical techniques and materials for general dentists to apply in various clinical situations.
- Discuss the current philosophies and controversies in the dental specialties.
- Demonstrate new skills in constructing and judging sound multidisciplinary treatment plans.

Continuing Education Credit: Max hrs. 28

INTRODUCING CONTEMPORARY ORAL & MAXILLOFACIAL SURGERY TECHNIQUES TO YOUR DENTAL PRACTICE

16-18 November 2009

Quota: 100

Course Data Processing Code:

887U-10010

Course Identification Number:

B-6C-1005

Director

CDR Milan Jugan, DC, USN, DMD

Diplomate, American Board of Oral Maxillofacial Surgery

Oral Surgery Division, BDC Naval Base, San Diego, CA

Eligibility Federal agency dentists, active and reserve, and government employed dentist. Non-federal agency dentists on a space available basis.

Course Description This course is designed for the general practitioner who is interested in introducing the latest advances in clinical outpatient oral and maxillofacial surgery to their practice. Topics covered will include management of the medically compromised patient, treatment of medical emergencies in the dental operator, basic and complicated exodontia technique, management of post-operative complications, recognition and treatment of odontogenic infection, diagnosis and treatment of facial trauma, dental implant treatment planning, localized bone reconstruction techniques, advances in oral and maxillofacial radiology, overview of orthognathic surgery and the recognition of common oral pathoses.

Anticipated Learning Outcomes

- Diagnose and treatment plan common oral surgical cases.
- Recognize the medically compromised patient and manage medical emergencies in the dental operator.
- Recognize situations requiring referral to oral and maxillofacial surgeons, or coordination with other dental specialties.

Continuing Education Credit: Max hrs. 21

NITROUS OXIDE/OXYGEN INHALATION SEDATION

7-8 December 2009

Quota: 30

Course Data Processing Code:
230U-10010

Course Identification Number:
B-6C-2000

Director

CDR Laura McFarland, DC, USN

Division Head, Oral Surgery Department, BDC Marine Corps Recruit Depot, San Diego, CA

Eligibility Active Duty DoD dentist only.

Course Description This course is designed for the dental officer who is interested in utilizing Nitrous Oxide and Oxygen Inhalation Sedation in her/his practice. Among the topics covered will be the pharmacology of nitrous oxide; advantages and disadvantages of its use; indications and contraindications; prevention, recognition, and management of complications; patient evaluation and risk assessment; airway management; physiologic monitoring of the patient; basic components and function of inhalation sedation equipment; and nitrous oxide and oxygen inhalation technique. The course meets the guidelines established by the ADA for teaching inhalation sedation with nitrous oxide.

Anticipated Learning Outcomes

- Recognize the indications for the use of nitrous oxide sedation.
- Understand the pharmacology of nitrous oxide sedation.
- Safely administer nitrous oxide sedation to appropriate dental patients.
- Understand the environmental hazards and abuse issues related to nitrous oxide.

Continuing Education Credit: Max hrs. 14

OPERATIVE DENTISTRY

11-13 January 2010

Quota: 100

Course Data Processing Code:
887M-10010

Course Identification Number:
B-6C-1007

Director

CAPT James Strother, DC, USN
Board Certified, American Board of Operative Dentistry

Eligibility Federal agency dentists, active and reserve, and government employed dentists. Non-federal agency dentists on a space available basis.

Course description This course will review principles of operative dentistry with consideration of newer techniques and restorative materials. A philosophy of preventive/conservative dentistry as well as “Helpful Hints” providing alternative treatment modalities will be presented. Subjects include concepts in cariology, caries risk assessment, cavity preparations, treatment planning, esthetics and restorative dental materials. A portion of time will be dedicated for the major dental companies to exhibit recent products and restorative materials.

Anticipated Learning Outcomes

- Appreciate the role of operative dentistry in the future of dental health care delivery.
- Integrate caries risk assessment and non-invasive treatment modalities with conventional restorative treatments.
- Introduce new techniques and materials into the daily practice of operative dentistry.

Continuing Education Credit: Max hrs. 21

ORAL MEDICINE AND ORAL PATHOLOGY

1-3 February 2010

Quota: 100

Course Data Processing Code:
877N-10010

Course Identification Number:
B-6C-1008

Director

CDR David Tindle, DC, USN

Division Head, Oral Diagnosis & Oral Radiology Division, BDC Naval Base, San Diego, CA

Eligibility Federal agency dentists, active and reserve, and government employed dentists. Non-federal agency dentists on a space available basis.

Course Description This course is designed to combine the disciplines of Oral Medicine and Oral Pathology in a meaningful and practical way. Emphasis will be given to recognition of hard and soft tissue lesions of the oral cavity. Additionally, systemic diseases and cutaneous disorders with oral manifestations will be discussed. Clinical presentation and histopathology will be correlated.

Anticipated Learning Outcomes

- Develop a reasonable differential diagnosis for hard and soft tissue lesions.
- Correlate clinical features of disease with soft tissue and radiographic changes.
- Explain the significance of color, shape and texture in the diagnosis of a lesion.

Continuing Education Credit: Max hrs. 21

ORTHODONTICS AND PEDIATRIC DENTISTRY

8-11 February 2010

Quota: 100

Course Data Processing Code:
03G2-10010

Course Identification Number:
B-6C-1027

Directors

CDR Dave Gilmore, DC, USN
Command Consultant for Orthodontics, BDC Naval Base, San Diego, CA

CDR Scott Haluska, DC, USN
Command Consultant for Pediatric Dentistry, BDC Naval Medical Center San Diego, CA

Eligibility Federal agency dentists, active and reserve, and government employed dentists. Non-federal agency dentists on a space available basis.

Course Description This course will present a review of current concepts and fundamentals in diagnosis, treatment planning, and treatment delivery for patients with various pediatric and orthodontic anomalies. Lectures will include case reviews and references to the literature. Comprehensive as well as limited and emergency dental care for the pediatric and orthodontic patient will be discussed. General dentists stationed overseas will find this course to be beneficial due to dependent treatment being provided OCONUS.

The orthodontic topics covered will include diagnosis, treatment planning and correction of various malocclusions, orthodontic mechanics, interceptive orthodontics, eruption anomalies, appliance therapy, and new technologies such as Temporary Anchorage Devices (TADs) and treatment with the Invisalign appliance.

The pediatric dentistry topics covered will include diagnosis and treatment planning, patient management (including special needs patients), preventive regimens, restorative techniques, pulp

therapy, management of trauma, space management and interceptive treatment from infancy to adolescence. A one-half day session will be devoted to various hands-on exercises. This course will enable the participant to develop a better understanding in identifying and diagnosing patients with orthodontic and pediatric treatment needs and to become familiar with a variety of treatment modalities of these patients.

Anticipated Learning Outcomes

- Diagnose various malocclusions and be able to make appropriate orthodontic and pediatric referrals.
- Develop an understanding of basic orthodontic materials and treatment mechanics using fixed appliances.
- Review the timing of eruption and appropriate management of various eruption anomalies including ectopic eruptions and impactions.
- Identify the indications for space management and the various appliances used to prevent space loss.
- Learn various techniques used to provide interceptive orthodontics using removable appliances.
- Develop an understanding of indications for the use of Temporary Anchorage Devices and for the Invisalign appliance.
- Describe current techniques used to treat anterior and posterior crossbites.
- Recognize the rationale for serial extraction, when it is indicated and its role in assisting the eruption of the permanent dentition when crowding is anticipated.
- Become familiar with the use of expansion appliances to correct maxillary transverse deficiencies.
- Develop an appreciation for the role orthognathic surgery plays in conjunction with orthodontics in treating various malocclusions.
- Describe the fundamentals in performing a comprehensive examination on a child including ordering appropriate radiographs.
- Understand the etiology and prevention of Early Childhood Caries.
- Review the full range of patient management techniques and their acceptability by parents.
- Diagnose, treatment plan and manage pediatric dental emergencies, traumas, infections, pulp therapy and space management.
- Learn current restorative options in pediatric dentistry.

Continuing Education Credit: Max hrs. 28

OROFACIAL PAIN AND TEMPOROMANDIBULAR DISORDERS

22-25 February 2010

Quota: 100

Course Data Processing Code:
887T-10010

Course Identification Number:
B-6C-1006

Director

CAPT Dorothy C. Dury, DC, USN, DDS, MS, PHD
Diplomate, American Board of Orofacial Pain
Diplomate, American Academy of Oral Medicine
Regional Specialty Leader for Orofacial Pain and Temporomandibular Disorders, BDC NMCSO, CA

Eligibility Federal agency dentists, active and reserve, and government employed dentists. Non-federal agency dentists on a space available basis.

Course Description This course will provide guidelines for the evaluation, differential diagnosis and conservative management of orofacial pain with specific emphasis on temporomandibular disorders (TMD). The course following guidelines of the Academy of Orofacial Pain, will utilize case based learning and is based on current evidence concerning TMD. Differentiation between various subgroups of TMD conditions will be a primary emphasis. Rationally based multidisciplinary therapeutic regimens including occlusal appliances, pharmacotherapy, physiotherapy and surgical management will be discussed along with the proper evaluation of treatment outcomes.

Anticipated Learning Outcomes

- Understand terminology, epidemiology and etiology of TMD.
- Understand the basic anatomy and physiology of TMD.
- Conduct and evaluate a patient history and examination, identifying pertinent information.
- Arrive at an appropriate differential diagnosis TMD.
- Prescribe dental treatment, behavioral modification, pharmacological management and/or physical therapy appropriate for specific TMD.
- Understand therapeutic rationale for fabrication of occlusal appliances.

REMOVABLE PROSTHODONTICS IN THE COMPREHENSIVE DENTAL PRACTICE

15-17 March 2010

Quota: 100

Course Data Processing Code:
887R-10010

Course Identification Number:
B-330-0010

Co-Directors

CDR Stephen Alfano DC USN

Maxillofacial Prosthodontists, BDC Naval Medical Center San Diego, CA

CDR Sam Westock, DC, USN

Prosthodontics, BDC North Island, San Diego, CA

Eligibility Federal agency dentists, active and reserve, and government employed dentists. Non-federal agency dentists on a space available basis.

Course Description: This course will present a Postgraduate review of Fixed Dental Prosthetics for the new and experienced practitioner. The principles of diagnosis, treatment planning, and treatment of the conventional and implant prosthodontic patient will be addressed, with the general practitioner as the restorative member of an interdisciplinary team.

Anticipated Learning Outcomes

- Fixed Prosthetics and interdisciplinary treatment with dental specialties: Perio, Endo, Orthodontics and Oral surgery
- Treatment Planning Dental Implants in Fixed Prosthodontics.
- Understanding techniques and materials that can make your Fixed Prosthodontic treatment more consistent and predictable.
- Porcelain Fused to Metal, All-ceramic, all Metal restorations: Treatment planning esthetics and understanding material options.

- Treatment Planning and case coordination for combined Fixed and Removable (RPD) cases: (ie. survey crown preparation for RPD design)
- Know how and when to refer to a specialist.

Continuing Education Credit: Max hrs. 21

PERIODONTICS

22-24 March 2010

Quota: 100

Course Data Processing Code:
3184-10010

Course Identification Number:
B-6C-1110

Director

LCDR Eric Schoenbeck, DC, USN

Periodontics Division, BDC Marine Corps Recruit Depot, San Diego, CA

Eligibility Federal agency dentists, active and reserve, and government employed dentists and hygienists. Non-federal agency dentists on a space available basis.

Course Description This course is designed to update practitioners on the current state of the art in Periodontics. Current, practical information will be provided to enhance the general dentist's familiarity and treatment options with the dental care of the periodontal patient. This course will cover such topics as the nonsurgical treatment including chemotherapy, treatment planning, periodontal considerations for restorative dentistry, management of endodontic-periodontic lesions, osseointegrated dental implants, diagnosis and treatment of aggressive periodontitis, and periodontal plastic surgery.

Anticipated Learning Outcomes

- Describe various periodontal surgical procedures used to manage soft tissue defects.
- Discuss all forms of nonsurgical periodontal therapy.
- Describe aggressive periodontitis and discuss treatment options.
- Explain the clinical importance of the periodontic/prosthetic/endodontic interrelationships.
- List the considerations for placement and restoration of a single tooth replacement with dental implant.
- Identify the important aspects of periodontal maintenance therapy.

Continuing Education Credit: Max hrs. 21

PREVENTIVE DENTISTRY FOR HOSPITAL CORPSMAN

12-15 April 2010

Quota: 12

Course Data Processing Code:
877K-10010

Course Identification Number:
B-330-0013

Director

LCDR Eric Schoenbeck, DC, USN
Periodontics Division, BDC Marine Corps Recruit Depot, San Diego, CA

Eligibility Active duty Navy Hospital Corpsman. All other federal agency dental assistants on a space available basis.

Course Description This course is designed specifically for enlisted personnel actively working in preventive dentistry or periodontics departments. The course includes lectures, demonstrations, and clinical instruction working with patients in applications of preventive dentistry such as performing supragingival calculus removal, oral prophylaxis procedures, plaque control instructions, fluoride treatments, and sealant application.

Anticipated Learning Outcomes

- Perform dental prophylaxis procedures with increased confidence and effectiveness.
- Educate patients in preventive treatment and behavior.
- Understand the dental technician's role in implementation of the Navy Preventive Dentistry Program.
- Apply sealants to commence qualifications as a Navy sealant technician.

CASUALTY TREATMENT TRAINING FOR DENTAL OFFICERS

3-6 May 2010

Quota: 32 Officers

Course Data Processing Code:
875D-10010

Course Identification Number:
B-6C-6002

Director

CDR Milan Jugan, DC, USN, DMD
Diplomate, American Board of Oral Maxillofacial Surgery
Oral Surgery Division, BDC Naval Base, San Diego, CA

Eligibility U.S. Navy active duty with preference given to deploying personnel. Active duty/deployable Reserves in other armed services and international military students on a space available basis.

Course Description A team approach to trauma treatment with an emphasis on the principles of triage and advanced lifesaving techniques in an austere environment.

Anticipated Learning Outcomes

- Understand and apply the principles of triage to mass casualty situations.
- Demonstrate the indications for, and techniques of, advanced lifesaving measures.
- Integrate skills into the dentist-hospital corpsman team.
- Understand modifications of treatment and practice in the austere environment.
- Gain resources for additional study and development.

Continuing Education Credit: Max hrs. 28

CASUALTY TREATMENT TRAINING FOR HOSPITAL CORPSMAN

3-6 May 2010

Quota: 32

Course Data Processing Code:
887J-10010

Course Identification Number:
B-330-0012

Director

CDR Milan Jugan, DC, USN, DMD
Diplomate, American Board of Oral Maxillofacial Surgery
Oral Surgery Division, BDC Naval Base, San Diego, CA

Eligibility Active duty Navy hospital corpsman. Other U.S. armed services medical technicians and international military students on a space available basis.

Course Description This course is designed to update hospital corpsman practical and didactic knowledge of basic casualty management. As a first responder to a combat or civil emergency situation, the hospital corpsman must know how to assess patients, provide effective emergency care using minimum equipment, and to stabilize personnel for evacuation. This course applies practical application and procedures for field mass casualty management.

Anticipated Learning Outcomes

- Become familiar with the hospital corpsman role in a contingency/operational setting.
- Outline the rapid trauma assessment surveys.
- Demonstrate effective resuscitative measures for patients with multiple life-threatening injuries, in priority sequence.
- Discuss the principles of triage, as they relate to emergency situations where the number or extent of casualties exceeds the resources and treatment capabilities.
- Demonstrate appropriate CBR warfare awareness.
- Demonstrate a sound practical knowledge by effectively operating in a mass casualty exercise with multiple injured patients, maintaining security, safety, and control of the scene.

SAN DIEGO AREA DENTAL LABORATORY (ADL) WORKSHOP

24-27 August 2010

Quota: 80

Course Data Processing Code:
433F-10010

Course Identification Number:
B-331-0024

Director

CAPT Patrick Steiner, DC, USN
Maxillofacial Prosthodontist
Regional Consultant for Dental Laboratory Services
Head, Area Dental Laboratory, NMCSO, CA

Eligibility Active duty enlisted laboratory technicians and qualified civilian laboratory technicians employed by DoD or other Federal dental laboratories.

Course Description This course is designed to refresh and update the knowledge and skills of prosthetic laboratory technicians through exposure to current standards and advancements in dental laboratory technology. An ADL update, as well as safety and infection control will also be presented. Presentations will be in the form of lectures, demonstrations, with an emphasis on hands-on training. Leading dental laboratory manufacturers will be present to display new products and innovations in the field. The National Board of Certification approves this course for continuing education credits awarded to Certified Dental Technicians and recognized graduates.

Anticipated Learning Outcomes

- Exposure to current concepts, techniques, and materials in the field of dental laboratory technology.
- Familiarization of basic and advanced techniques through demonstrations and hands-on presentations.
