Leader Training

Leaders play a critical role in helping Sailors and their families recognize and address combat and operational stress issues. The Navy OSC-Leader training helps leaders understand that role while enhancing their skills. Line-leaders will leave this course better prepared to recognize stress reactions in shipmates and provide them with the appropriate help.

The Navy Operational Stress Control (OSC) Leader Training is a 1-day course designed to provide practical and effective specialized training to Navy Officers and Chief Petty Officers.

TRANSFORMING RESEARCH INTO PRACTICAL TOOLS

- Learn to apply the 5 Core Leader Functions and the Stress Continuum.
- Hear about the benefits of individual and organizational resilience and its importance to mission readiness.
- Benefit from open and honest dialogue with peers as they discuss how they've addressed real-life leadership challenges.
- Transform operational stress control from a concept into a way of doing business with the help of real-life scenarios, face-to-face interaction, and discussions with a command leader panel.
