How to Search

There are two ways to search the JLLIS:

1. Search NOMLLIS Observations
2. Joint Search.

NOMLLIS Observation Search

Selecting the Search NOMLLC O&R link from the Left Menu will allow the user to search all active observations in the NOMLLIS. The page defaults to include all Active observations at the bottom of the page while the top portion allows the user to filter these observations by the available fields.

Selecting the Find button will yield these results, while selecting the Reset button will return the user to the unfiltered results. The user may then select on the Observation Topic to view the lesson.
