

DIABETES, YOU COULD BE AT RISK

Take the Test—Know Your Score!

Diabetes means your blood sugar (glucose) is too high. How would you know? Are you often thirsty, hungry, or tired? Do you urinate often? Do you have sores that heal slowly, tingling in your feet, or blurry eyesight? Even without these signs, you could still have diabetes. Diabetes is a serious disease. It can cause heart attack or stroke, blindness, kidney failure, or loss of feet or legs. But diabetes can be controlled. You can reduce or avoid these health problems. Take the first step. Find out if you are at high risk.

Know your risk of having diabetes now. Answer these quick questions. For each Yes answer, add the number of points listed. All No answers are 0 points.

Question	Yes	No
Are you a woman who has had a baby weighing more than 9 pounds at birth?	1	0

These questions are from the American Diabetes Association's "Diabetes Risk Test."

At Risk Weight Chart

Height	Weight (Pounds)	Height	Weight
4'10.....	129	5'8.....	177
4'11.....	133	5'9.....	182
5'0.....	138	5'10.....	188
5'1.....	143	5'11.....	193
5'2.....	147	6'0.....	199
5'3.....	152	6'1.....	204
5'4.....	157	6'2.....	210
5'5.....	162	6'3.....	216
5'6.....	167	6'4.....	221
5'7.....	172		

If you scored...	Then your risk is...
10 or more points	High for having diabetes now. Please bring this form to your health care provider soon. If you don't have insurance and can't afford a visit to your provider, contact your local health department.
3 to 9 points	Probably low for having diabetes now. Keep your risk low. If you're overweight, lose weight. Be active most days, and don't use tobacco. Eat low-fat meals with fruits and vegetables, and whole-grain foods. If you have high cholesterol or high blood pressure, talk to your health care provider about your risk for diabetes.

If you scored 10 or more, contact your PCM or one of the Certified Diabetes Educators (CDEs) at Naval Hospital Pensacola. LaNora Glaze, RN, CDE at 505-7099 or Joyce Robinson, RN, CDE at 505-6367.
