(3) Filing System Guidelines
(4) Established List of Standard Subject Identification Code
(5) Sample File Plan
(6) Additional Duty Appointment Format Letter
(7) Procedural Guidelines for Completing the SF-135

1. Purpose

a. To issue Chief, Bureau of Medicine and Surgery (BUMED) records management program (RMP) policy ensuring medical and administrative documents created or acquired by BUMED, Regional Commands, and component activities are properly managed from creation/receipt through final disposition, thereby complying with federal laws and Department of the Navy (DON) records management requirements established in references (a) through (j).

b. To provide guidance regarding e-mail and other electronically generated information that meets the definition of a Federal record as prescribed in reference (a). Adherence to the procedures described in this instruction will support deployment of an approved electronic Records Management Software Application (eRMSA) package that will be selected and fielded by Navy Medicine Command Information Officer (CIO) in accordance with reference (b). Proper Standard Subject Identification Code (SSIC) categorization of e-records created or received is essential to properly manage electronically generated records (i.e., e-mail (with or without attachments), word processing documents, spreadsheets, etc.).

- c. To appoint the Navy Medicine Records Management Program Officer (RMPO) as required by reference (c) to implement the policies and objectives of the DON Records Management Program (RMP) throughout Navy Medicine.
- d. To appoint Records Management Coordinators (RMC) at BUMED and throughout Navy Medicine component activities. BUMED Director for Administration, M09B1, appoints the RMC for Headquarters (HQ).
- e. To assign enterprise-wide responsibilities for execution of and familiarization with the requirements of this instruction to all Navy Medicine personnel as delineated in enclosure (1).

2. Applicability

a. Records management procedures discussed in this instruction are applicable to all Navy Medicine personnel, including contractors, and includes all medical and administrative records and files generated and maintained at HQ and throughout Navy Medicine with certain exceptions.

b. The disposition requirements of reference (d) are not applicable to:

(1) The hard copy and electronic working files assembled in the creation of HQ instructions, notices, change transmittals, interim message changes, manuals, publications, joint directives, and other official policy issuances. Permanent and ready access is required for potential legal matters and policy development activity.

(2) Records freezes or holds.

3. Definitions. Special terms used in this instruction are explained in the glossary at enclosure (2). Of particular importance is the definition of "record."

4. Background

a. Records Management. Navy Medicine is required by federal law and Navy regulation to institute an effective RMP that ensures the accurate and efficient management of all records. Navy Medicine RMP is designed to ensure that our records are created, maintained, and dispositioned (destruction/deletion or transfer) in accordance with references (a) through (j). This instruction will be revised by Navy Medicine CIO to issue enterprise electronic record archiving requirements and selection/deployment guidance for electronic records management software.

b. Filing. Filing procedures constitute an integral part of a RMP. Reference (e), Chapter 1, provides general guidance for establishing a filing process for records created and maintained throughout Navy Medicine. Procedures in enclosure (3) provide guidance to ensure medical and administrative records are properly stored and dispositioned and shall be followed by all

personnel responsible for creating and maintaining records. These guidelines establish the model for our filing process and meet the legal and procedural requirements of references (d) and (e). Enclosure (4) presents a listing of SSICs used throughout Navy Medicine in addition to the standard medical SSICs from chapter 6, Part III of reference (d).

c. Disposition. The disposition guidance contained in reference (d) is mandatory and shall be followed by all personnel. Requests for exceptions to disposition guidance shall be forwarded by naval letter via the chain of command to RMPO (M09B3) for approval.

d. Electronic Records. Electronic documents and files and e-mail messages are considered records when they meet the definition in reference (a), Federal Records Act, Chapter 33, and must be managed accordingly. Reference (f), Sections C and D provide guidance for records management procedures for these documents and is supplemented by the specific guidance contained in this instruction.

5. Policy. BUMED, Regional Commands, and their subordinate activities shall create, maintain, and disposition medical and administrative records as specified in references (a) through (j) and the following provisions:

a. Records Management Program Officer. Director, Secretariat (M09B3) is designated the RMPO for Navy Medicine and shall develop and issue program policy and procedure guidance, effect oversight, and ensure compliance.

b. Records Management Coordinators. BUMED, Regional Commands, and their subordinate activities shall appoint a RMC in writing to manage the RMP to ensure compliance with this instruction. Regional RMCs will serve as the coordination point of contact for the RMPO and ensure compliance throughout their Region.

c. Records Creation

(1) Navy Medicine personnel are responsible for ensuring that records are created, maintained, and preserved to document business operations and furnish information necessary to protect legal and financial rights of Navy Medicine and persons affected by our mission activity.

(2) Records will be identified by SSIC. SSIC classification is the basis for managing records and, in accordance with reference (c), shall be used on all records created including e-mail, letters, memorandums, messages, directives, forms, and reports.

(3) To minimize the recordkeeping burden on recipients and to minimize the impact on the electronic communications system, creators of e-mail messages shall limit distribution of messages to recipients who have "action responsibility" or the "need to know." The creator and recipient of an e-mail message shall determine whether it meets the definition of a record.

A document may be a record in more than one office. E-mail messages that may meet the record definition include official correspondence, memoranda to include memoranda for the record, General Administration messages, personnel and financial documents, e-mails and attachments transmitted in conducting agency business, policy documents, etc.

d. Filing Procedures for Hardcopy Records

(1) BUMED and subordinate activities will implement the procedures contained in enclosure (3) and ensure compliance with the filing requirements of reference (g) for classified material. Record files may be centralized at the activity, department, or office organizational level and maintained by a designated individual, or decentralized and maintained by individual members of the department/office. Decentralized records systems must be accessible at all times. The system design will be approved by the RMC to optimize mission attainment. RMCs shall also approve file plans for each department/office and maintain a consolidated file plan. All records files shall be managed per this instruction. See enclosure (5) for a sample file plan format.

(2) Special provisions shall be established to manage commands' permanent records and other records important to Navy Medicine having long-term permanent worth because of continuing administrative, legal, scientific, or historical value. This function shall be overseen by the RMC. These files may include vital records as defined by reference (d); records on hold or frozen by RMPO notification; command policy documents; documents signed by, for, or by direction of the commander; and other records specified by command policy. These records shall be managed to comply with this instruction and cited higher authority guidance.

e. Filing Procedures for Electronic Records. Electronic records (e-records) such as e-mail, word processing documents, spreadsheets, and Power Point presentations shall be filed. Until an eRMSA package is fully operational within Navy Medicine, BUMED activities' e-records shall be stored and filed in the activity's hardcopy filing systems pending final disposition per reference (d), Part III, and reference (e), and this instruction. Alternatively, e-records may be managed in an electronic format in a structured local repository; however, any records deleted from the electronic system must be printed and stored. All classified e-records shall be filed in compliance with reference (g). In all cases the permanent deletion of e-records when not printed and filed must meet the disposition guidance contained in reference (d), Part III. Once an eRMSA package, certified compliant with reference (b), is selected and fielded by Navy Medicine CIO, the system will become the Navy Medicine standard and the only authorized repository for the storage of electronic records. The eRMSA package will provide the capability to store e-mail messages and other approved electronic files with their appropriate meta data to facilitate research and discovery. The eRMSA package will support records categorization by SSIC and electronic filing and management through final disposition to include transfer to National Archives and Records Administration (NARA). It should be noted that e-mail is releasable under references (h) and (i), legal, and court orders and require filing until no longer needed for these purposes.

f. Retention and Disposal. Reference (d) provides specific and mandatory guidance on the retention and disposition requirement for each type of record used within DON. Disposition is divided into two categories.

(1) Permanent Records. All records identified in reference (d) as permanent will be transferred to NARA when no longer needed for administrative, legal, or fiscal purposes. The specific retention period before transfer is normally specified in the record's retention standard. At the time of acceptance by NARA, ownership is transferred from Navy Medicine to NARA. NARA can accept permanent records in paper or electronic media.

(2) Temporary Records. Temporary records must be retained for the period specified in reference (c) and then destroyed/deleted. Temporary records with retention periods greater than 3 years may be retired to Federal Records Centers (FRC).

g. Records Removal. Removal of official records from BUMED activities is not permissible by any individual for any reason. They may remove personal files at their discretion without RMC notification. Extra copies of official records may be removed for conduct of official command business with the approval of the RMC.

h. Personal Record or Papers. Retained personal records (not Federal Records) must be clearly marked "Personal Papers" and kept separate from official records. Additional guidance is contained in reference (d), Part I, paragraph 14.

i. Reference Materials. Reference materials may be maintained either as a paper record or electronically, provided the stored material is retrievable until no longer required for reference.

j. Backup Files. Electronic records backup files are for disaster recovery and not to be used as backup storage to locate records deleted from active electronic systems. Navy Medicine CIO shall establish policy and procedures for the development, maintenance, storage, and disposal of backup media.

k. Vital Records. Each BUMED activity will develop a file plan that identifies records that are necessary for the activity to accomplish mission essential functions without unacceptable interruption during a national security emergency or other emergency or disaster and also protects the legal and financial rights of Navy Medicine and of individuals directly affected by its activity. Reference (d), Appendix H contains additional guidance.

l. Records Freezes and Holds (e.g., Preservation Orders, Freedom of Information and or Privacy Act Requests). Regardless of the retention standards established by reference (d), Part III, records pertaining to unsettled claims for or against the Federal government, current or pending litigations, preservation orders, Freedom of Information and/or Privacy Act requests, audit agency exceptions, or incomplete investigations shall not be dispositioned. The records must be retained until the litigation or action is settled, the investigation is completed, the

preservation order is lifted, or the exception is cleared. RMPO shall oversee and coordinate this process throughout Navy Medicine with guidance from BUMED Office of Medical-Legal Affairs, M09B9. These records shall not be dispositioned by RMCs without written approval from RMPO and M09B9 concurrence. Records frozen or on hold shall be segregated and retained in command central files office until RMPO notification. Compliance action taken by activities with these records will be confirmed in writing to RMPO.

m. Facsimile Transmission Records. Section E of reference (f) provides information on the use of facsimiles. Facsimiles that meet the definition of a record are managed in conformance with reference (d).

n. Personal Data. With the rise in identify theft, all persons having Federal records containing personal data (name, SSN, home address, date and place of birth, etc.) must exercise due caution to ensure that this information is protected. Personal data is subject to protection and must be marked as "FOR OFFICIAL USE ONLY (FOUO) – PRIVACY SENSITIVE. Any misuse or unauthorized disclosure may result in both civil and criminal penalties." See reference (i) for additional information concerning protection and destruction.

o. Protected Health Information (PHI). Navy Medicine activities shall ensure that PHI is protected in compliance with reference (j). This requirement includes the provision of awareness, training, and education to all personnel including contractors.

6. Forms. The following General Services Administration form, SF 135 (07/1985), Records Transmittal and Receipt, is available electronically at:
<http://www.gsa.gov/Portal/gsa/ep/formslibrary.do?formType=SF>.

7. Access to References

a. Access to the SECNAV instructions mentioned in this instruction is available on the Web at the Department of the Navy Issuances <https://doni.daps.dla.mil/default.aspx>.

b. Access to DOD directives in this instruction is available on the Web at <http://www.dtic.mil/whs/directives/>.

A. M. ROBINSON, JR.

Distribution:

	FH36	(NAVMED NCA)

Distribution is electronic only via the Navy Medicine Web site at:
<http://navymedicine.med.navy.mil/default.cfm?seltab=directives>

ENTERPRISE RESPONSIBILITIES

Navy Medicine personnel shall comply with the records management requirements in this instruction and comply with the specific duties in this enclosure as applicable. RMCs shall manage the execution of the responsibilities of personnel within their area of responsibility (AOR).

1. Director, Secretariat (BUMED, M09B3) shall:

a. Serve as Navy Medicine RMPO and develop and issue program policy and procedure guidance, effect oversight, and ensure compliance with references (a) through (j) and this instruction.

b. Ensure that Navy Medicine activities and personnel are familiar with the requirements of RMP and comply with its intent.

c. Chair the Navy Medicine Records Management Committee responsible for Navy Medicine policy development. This committee will include HQ's code and Regional command representation.

2. Regional Commanders are responsible for compliance with references (a) through (j) and this instruction and implementation of RMP requirements at the Region level and direction, coordination, and oversight of these requirements throughout their AOR. They shall:

a. Appoint the RMC in writing to manage the Regional command RMP and as lead records manager for the Region's AOR. The RMC shall coordinate program execution with RMPO and provide direction and oversight to subordinate activities' RMCs to ensure their programs comply with this instruction and higher authority guidance. A sample RMP appointment letter is at enclosure (6). The regional RMP will maintain a file copy of subordinate activities' appointment letters.

b. Identify all file plans maintained within the AOR. Records that meet the definition of Federal record in reference (a) will be managed in accordance with references (b) through (j) and this instruction. Enclosure (5) will be used to create and document file plans. File plans shall be established for all centralized or decentralized records systems with appropriate disposition instructions for all records, regardless of media, per reference (d). The RMC shall approve all plans and maintain a file-copy.

c. Determine the form that official electronic records will be maintained for its life cycle; i.e., paper, tape, CD, OD or other format and establish procedures for identifying, cataloging, and labeling electronic records when they are created.

d. Specify the method of implementing controls over classified, sensitive, proprietary, and Privacy Act records stored and used electronically per references (g), (h), and (i).

e. Ensure that filing and retrieval systems consistent with this instruction and reference (e) are established.

f. Ensure PHI is protected throughout the AOR in compliance with reference (j). This requirement includes the provision of awareness, training, and education to all personnel including contractors.

g. Ensure annual training requirements per reference (c) are accomplished throughout the AOR. The Web-based training course is available on Navy Knowledge Online (NKO) at www.nko.navy.mil. Select Navy E-Learning, Browse Categories, US Department of Navy, DON E-business Training, and "Records Management in the DON: Everyone's Responsibility."

h. Ensure the Security Officer provides technical guidance to RMC for issues pertaining to the proper classification and management of classified and sensitive records and implementing the provisions of the mandatory declassification program directed by reference (g) at the Region.

3. Commanders, Commanding Officers, and Officers-in-Charge are responsible for compliance with references (a) through (j) and this instruction and implementation of RMP requirements within their command and direction, coordination, and oversight of these requirements throughout their AOR. They shall:

a. Appoint an RMC in writing to manage the command's RMP and as lead records manager for the command's AOR to coordinate program execution with the Regional RMC, and provide direction and oversight to department heads and clinics to ensure compliance with this instruction and higher authority guidance. A sample RMP appointment order is at enclosure (6). A copy of the appointment letter shall be provided to the regional RMC.

b. Identify all file plans maintained within the AOR. Records that meet the definition of Federal record in reference (a) shall be managed in accordance with references (b) through (j) and this instruction. Enclosure (5) shall be used to create and document file plans. File plans shall be established for all centralized or decentralized records systems with appropriate disposition instructions for all records, regardless of media, per reference (d). The RMC shall approve all plans and maintain a file copy.

c. Determine the form that official electronic records will be maintained for its life cycle; i.e., paper, tape, CD, OD or other format and establish procedures for identifying, cataloging, and labeling electronic records when they are created.

d. Specify the method of implementing controls over classified, sensitive, proprietary, and Privacy Act records stored and used electronically per references (g), (h), and (i).

e. Ensure that a filing and retrieval system consistent with this instruction and reference (e) are established.

f. Ensure PHI is protected throughout the command's AOR in compliance with reference (j). This requirement includes the provision of awareness, training, and education to all personnel including contractors.

g. Ensure annual training requirement per reference (c) is accomplished throughout the AOR. The Web-based training course is available on Navy Knowledge Online (NKO) at www.nko.navy.mil. Select Navy E-Learning, Browse Categories, US Department of Navy, DON E-business Training, and "Records Management in the DON: Everyone's Responsibility."

h. Ensure the Security Officer provides technical guidance to RMC for issues pertaining to the proper classification and management of classified and sensitive records and implementing the provisions of the mandatory declassification program directed by reference (g).

4. BUMED Director for Administration (M09B1) is responsible for compliance with references (a) through (j) and this instruction and implementation of RMP requirements at BUMED and direction, coordination, and oversight of these requirements within the individual HQ codes. M09B1 shall:

a. Appoint the HQ RMC in writing as the command's lead records manager to execute HQ program implementation, provide direction and oversight to all BUMED codes to ensure compliance with this instruction and higher authority guidance, coordinate the appointment of code RMCs in writing, and coordinate the HQ RMP with code RMCs. A sample RMP appointment order is at enclosure (6). The HQ RMC will maintain a file copy of each code's appointment letters. The HQ RMC shall also serve as the RMC for M09B.

b. Identify all files maintained within HQ. Records that meet the definition of Federal record in reference (a) will be managed in accordance with references (b) through (j) and this instruction. Enclosure (5) will be used to create and document all file plans. File plans shall be established for all centralized or decentralized records systems with appropriate disposition instructions for all records, regardless of media, per reference (d). The RMC shall approve all plans and maintain a file copy.

c. Determine the form that official electronic records will be maintained for its life cycle; i.e., paper, tape, CD, OD, or other format and establish procedures for identifying, cataloging, and labeling electronic records when they are created.

d. Specify the method of implementing controls over classified, sensitive, proprietary, and Privacy Act records stored and used electronically per references (g), (h), and (i).

e. Ensure that a filing and retrieval systems consistent with this instruction and reference (e) are established.

f. Ensure PHI is protected throughout HQ in compliance with reference (j). This requirement includes the provision of awareness, training, and education to all personnel including contractors.

g. Ensure annual training requirement per reference (c) is accomplished throughout the AOR. The Web-based training course is available on Navy Knowledge Online (NKO) at www.nko.navy.mil. Select Navy E-Learning, Browse Categories, US Department of Navy, DON E-business Training, and "Records Management in the DON: Everyone's Responsibility."

h. Ensure the Security Officer provides technical guidance to RMC for issues pertaining to the proper classification and management of classified and sensitive records and implementing the provisions of the mandatory declassification program directed by reference (g).

5. Office of Medical-Legal Affairs (M09B9). HQ Medical-Legal Affairs shall advise the RMPO on all legal aspects of the RMP and this instruction and provide legal assistance on the administrative responses to judicial correspondence and orders for expungements and or amendments to records, motions for discovery, preservation orders, records freezes/holds, or other legal actions or issues pertaining to the RMP.

6. Office of Information (M09B6). Navy Medicine Command Information Officer shall:

a. Coordinate with RMPO and M8 to acquire approved software to establish the enterprise eRMSA solution for Navy Medicine electronic records that meet the requirements of reference (b) to include defining the training of all personnel in eRMSA. Oversee the deployment of the eRMSA throughout Navy Medicine. Coordinate with RMPO to revise this instruction to issue guidance for the selection/deployment of eRMSA and the enterprise electronic record archiving requirements.

b. Ensure that application developers and system administrators include records management plans and procedures that comply with this instruction and higher authority guidance in all electronic record systems development. Electronic records meeting the Federal record definition should be migrated to the eRMSA when a current electronic information system is terminated.

c. Develop and issue policy guidance for Navy Medicine to ensure PHI is protected throughout the enterprise in compliance with reference (j). This requirement includes the provision of awareness, training, and education to all personnel including contractors.

d. Provide technical assistance to the RMPO to ensure Navy Medicine complies with the electronic Freedom of Information Act requirements.

e. Include the RMPO in the planning of new or revision of existing electronic records systems to ensure that records management issues are properly addressed and that Federal records are properly managed throughout their life cycle.

f. Establish policy and procedures for the development, maintenance, storage, and disposition of backup media. Backup files are for disaster recovery of electronic records and not backup storage for electronic systems.

7. Security Officer (SO), M09B13, shall provide technical guidance to RMPO for issues pertaining to the proper classification and management of classified and sensitive records and the provisions of the mandatory declassification program directed by reference (g). SO shall also provide technical guidance to RMC for issues pertaining to the proper classification and management of classified and sensitive records and implementing the provisions of the mandatory declassification program directed by reference (g) at BUMED HQ.

8. BUMED RMPO shall:

a. Develop policy, procedure, and guidelines to implement references (a) through (j) and ensure their application as they apply to RMP for Navy Medicine. Coordinate closely with Office of Medical-Legal Affairs (M09B9) on all records management issues to ensure that they conform with Federal law/regulation and DON policy.

b. Serve as the principal adviser to Chief, BUMED and senior staff on all RMP issues.

c. Advise CIO on matters related to RMP. Advise systems development personnel on the requirement for integration of RMP requirements during electronic system development phase. The objective is to ensure electronic records systems incorporate solutions for the effective and efficient management of electronic records. Advise CIO on the acquisition of the enterprise eRMSA solution to meet the requirements of reference (b).

d. Issue program policy and procedure guidance, effect oversight, and ensure compliance with the requirements of the DON RMP throughout Navy Medicine. Ensure that Navy Medicine records are managed with the disposition schedules contained in reference (d) and take action to recommend new or revised retention standards when a record category is not covered.

e. Assess the status of Navy Medicine RMP every three years and effect corrective action to include survey and appraisal of the operations of records holding areas throughout Navy Medicine. Ensure records transfer, retirement, and retrieval with Federal Records Centers, NARA offices, and NARA Headquarters are accomplished according to the records retention standards and transfer procedures of reference (d).

f. Maintain liaison and coordination with Secretary of the Navy's Director of Records and Navy Records Manager (DNS-5), and NARA Headquarters.

g. Advise the BUMED Security Officer in the development of a HQ program to reduce classified records holdings to the absolute minimum required consistent with the provisions of reference (d), Part III and the provisions of reference (g).

h. Ensure PHI protection is incorporated in all RMP policies, procedures, and guidelines issued to enable compliance with reference (j). This requirement includes the provision of awareness, training, and education to all personnel including contractors.

i. Monitor the accomplishment of annual training requirement by Regional commanders per reference (c) throughout Navy Medicine and take remedial action as necessary.

j. Oversee Directives and Forms Branch (M09B31) personnel activity with the assignment of SSIC numbers, retention schedules, and disposition issues for BUMED directives and forms and reports management. This includes all higher authority issuances sponsored by BUMED.

k. Represent BUMED to DOD, DON, NARA, and other agencies concerning policy development and execution of RPM issues.

l. Ensure that RMCs receive training to accomplish their responsibilities per reference (c). Familiarization training of enclosures (3), (5), and (7) shall be included. Enclosure (7) provides guidance for completing SF-135.

m. Coordinate records freezes and holds throughout Navy Medicine with consultation from BUMED Office of Medical-Legal Affairs, M09B9. Shall provide written notification to the component activities for disposition guidance with M09B9 concurrence.

9. Records Management Coordinators (HQ/Regions/Field) shall execute the following within their activity/AOR:

a. Regional and field RMCs shall support responsibilities of command leadership specified in paragraphs 2 and 3 above, respectively.

b. Ensure compliance with references (b) through (j) and this instruction and implementation, direction, coordination, and oversight of RMP requirements throughout their AOR.

c. Establish centralized or decentralized filing and retrieval systems consistent with this instruction and higher authority requirements, including command central files offices as necessary. The RMC shall approve the design of all filing and retrieval systems to optimize mission attainment.

d. Ensure isolation and security of command permanent records and other records significant to Navy Medicine having long term / permanent value because of continuing administrative, legal, scientific, or historical importance. This may be accomplished as a centralized or decentralized function.

e. Develop file plans using guidelines provided in this instruction and reference (e). RMCs shall also approve file plans for each code/department/office and maintain a consolidated command file plan. See enclosure (5) for a sample file plan format.

f. Ensure personnel comply with the filing procedures detailed in enclosure (3) to standardize effective and efficient document construction and management.

g. Coordinate and perform records transfer, retirement, and retrieval with Federal Records Centers, local NARA offices, and NARA Headquarters per reference (d) and this instruction within the activity/AOR utilizing enclosure (7) to complete SF-135. Provide technical advice and assistance to codes/departments/offices in preparing records for transfer.

h. Execute guidance from RMPO and Regional RMC, respectively, and coordinate on all matters related to the proper management of Navy Medicine records. Exceptions to stated policy will be reported to RMPO via Regional RMCs.

i. Report alternative retention and disposition requirements to RMPO via the chain of command by naval letter and assist the RMPO in preparing new or changing DON disposal guidance per reference (d).

j. Notify the RMPO via the chain of command by naval letter when unscheduled records are located and ensure that the records are not destroyed pending receipt of proper authority from NARA.

k. Ensure records that have exceeded their retention period; i.e., aged-out, at the end of the fiscal year or calendar year are purged as prescribed in reference (d) and this instruction. Purging may commence no earlier than the beginning of the month following the FY or CY after the records have aged-out.

l. Comply with record freeze/hold notifications as directed by RMPO. These records shall not be dispositioned without official written notification from RMPO with M09B9 concurrence. Records frozen or on hold shall be segregated and retained until RMPO notification. Compliance action taken by activities with these records shall be confirmed in writing to RMPO.

m. Ensure PHI is protected throughout the command's AOR in compliance with reference (j). This requirement includes the provision of awareness, training, and education to all personnel including contractors.

n. Ensure annual training requirement per reference (c) is accomplished. The Web-based training course is available on Navy Knowledge Online (NKO) at www.nko.navy.mil. Select Navy E-Learning, Browse Categories, US Department of Navy, DON E-business Training, and "Records Management in the DON: Everyone's Responsibility."

o. Coordinate with SO for the technical guidance required to ensure proper classification and management of classified and sensitive records and to apply the provisions of the mandatory declassification program directed by reference (g).

10. Medical Inspector General (M00IG) shall develop RPM inspection criteria to identify the level of compliance and noncompliance with this instruction and report the adequacy of policy and procedure at all echelons of Navy Medicine.

11. Navy Medicine personnel shall familiarize themselves with and follow the provisions of this instruction.

GLOSSARY

1. **Cut Off/File Break.** This refers to the termination of a file at regular intervals to allow continuous disposal or transfer of file series. File cut off periods are normally by calendar or fiscal year. "Cut off" is sometimes referred to as "file break."
2. **Documentary Materials.** A collective term for Federal records, non-records materials, and personal papers that includes all media containing recorded information whatever the method or circumstance of recording. Federal records may be created on any physical media. The method of recording information may be manual, mechanical, photographic, electronic, or any combination of these or other technologies.
3. **National Archives and Records Administration (NARA).** The organization or agency responsible for appraising, accessioning, preserving, and making available permanent records. NARA is responsible for implementing records management laws within the Federal government.
4. **Non-Record Materials.** Information and documents not meeting the definition of a "Federal record" are called "non-record materials." This includes federally owned materials that are:
 - a. Not created or received under Federal law or in connection with government business.
 - b. Not preserved or considered appropriate for preservation because they lack evidence of agency or component activities or information of value.
 - c. Extra copies of documents kept only for convenience or reference.
5. **Permanent Records.** Any record with enduring value of a historical, research, legal, scientific, or cultural nature, and that documents primary missions, functions, responsibilities, or significant experiences and accomplishments.
6. **Personal Record or Papers.** These are materials belonging to an individual that are not used to conduct agency business. They are related solely to an individual's own affairs or are used exclusively for that individual's convenience. Correspondence designated "personal" or "private," but relevant to the conduct of public business is an official record and must be managed in accordance with this instruction.
7. **Record.** According to references (a) and (c) the term "record" includes all books, papers, maps, photographs, machine-readable materials, or other documentary materials, regardless of physical form or characteristic, made or received by an agency of the United States Government under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the

Government or because of the informational value of data in them. In short a "record" is any document or material made or received in the course of government business, which is or should be kept either as evidence of the conduct of business or because it contains valuable information. The electronic format has no bearing on whether the information is a record.

8. Records Management. Includes planning, controlling, directing, organizing, training, promoting, and managing activities involving information requirements, records creation, records maintenance and use, records preservation, and records disposition of all Federal agency records.

9. Standard Subject Identification Code (SSIC). A method for categorizing and subject classifying Navy and Marine Corps information that ensures documents are filed consistently and can be retrieved quickly. A SSIC is a four or five digit number that categorizes the subject of a document. Per reference (e) a SSIC is required on all DON records including, but not limited to, letters, messages, directives, forms and reports. The SSIC is to be used in conjunction with reference (d), which describes specific DON records and provides disposition schedules for them.

10. Temporary Records. Any record that does not qualify as permanent. Most files fall under this category. Examples include leave applications, Equal Employment Opportunity Program files, personnel files, general correspondence, security logs, etc.

11. Vital Records. These are records essential to the continued functioning or reconstitution of an organization during and after an emergency and also those records essential to protecting the rights and interests of the organization and of the individuals directly affected by its activities. Vital records include both emergency operating and rights-and-interest records. These records are considered part of an agency's continuity of operations plan.

FILING SYSTEM GUIDELINES

1. Filing Procedures

a. Maintaining information. Effective files maintenance and reference procedures are essential to document Navy Medicine's official business. This enclosure contains procedures for maintaining enterprise records.

b. Inspecting records. Prior to filing, inspect the document to ensure all actions have been completed and eliminate unnecessary attached material, (such as used envelopes, routing slips with no essential information and extra copies.) Identify incomplete actions to ensure that they are followed up and that the file will not be prematurely cut off. When action is complete, but essential documentation is missing, obtain the missing documents. If unsuccessful, note the action taken to obtain the missing documents and file it with the incomplete action.

c. Assembling and Fastening Records

(1) Remove any cover sheets, such as classified, before filing unless records are in a suspense file or when documents are placed in file containers pending completion of the action.

(2) Staple documents if possible. Other fasteners may be used when there are too many papers for stapling or physical characteristics prohibit stapling.

d. Marking the file number. As specified in reference (e), the author adds the file number (i.e., SSIC number and paragraph number) when creating a document, or places the file number along the right-hand edge of documents not identified with a file number at the time of creation. When the physical characteristics of a document make it self-identifying for filing purposes, posting the file number to the document is unnecessary.

e. Use of guides and folders.

(1) Use guides to divide files and to identify subdivisions for easier filing and retrieval.

(2) Use folders to consolidate, retrieve, and protect the records.

(3) Stamp the file folder with the classification per reference (g).

f. Arrangement of files. The filing arrangements described below are authorized for subdividing records under a file number and for the arrangement of records within the file folder. They may also be used for TOP SECRET records.

(1) Date arrangement. Arrange records chronologically in the folder.

(2) Simple number arrangement. Arrange records in simple numerical sequence, such as unit designation or project number.

(3) Alphabetical arrangement. Arrange records by subject and name.

(a) Subject. Use subject titles arranged alphabetically.

(b) Name. Arrange by the names of persons, places, or organizations. This is mainly used in personnel records. The following are examples of arrangements by name.

(4) Arrangement restrictions. Records not covered by a Privacy Act system notice will not be arranged to permit retrieval by personal identifier. Records covered by system notices published in the DON website Privacy Act Online (<http://privacy.navy.mil/noticenumber/index.html>) may be arranged for retrieval by personal identifier. Privacy Act Online contains system notices prepared according to the Privacy Act and published in the Federal Register.

g. Classified documents. File classified documents and unclassified documents in separate containers. There are two exceptions. First, documents may be stored together when the record of an action consists of both classified and unclassified documents and reference purposes require that both be filed together. Second, classified and unclassified documents may be stored in the same security container when a small volume of classified material is on hand and it is advantageous to use otherwise empty space for unclassified material. However, the classified material will be separated from the unclassified material by guide cards or by placement in separate drawers. Reference (g) provides additional guidance for filing classified records.

h. Suspense files. Suspense files are used as reminders that an action is required by a given date. File numbers need not be used on file folders or containers in which suspense documents are kept. Some samples of suspense files are as follows:

(1) A note to submit a report or to take some other action. The note would be destroyed after the report is submitted or the action is taken.

(2) An outgoing communication filed by the date on which a reply is expected. When the reply is received, the communication is withdrawn and filed (if it is the record copy) or destroyed (if it is an extra copy).

2. Labeling Procedures

a. File numbers. The file numbers listed in reference (d) identify documents for filing, reference, and legal disposition authority.

b. Labeling

(1) Label all folders and containers used to store official records.

(2) Labels will include the file number, file title, and the disposition instructions. Include the year of accumulation when a file is cut off after a time period. Do not include the year on a file with an event disposition or on the "ACTIVE" folder of a time-event file.

(3) Enter the file number and file title on the label as they appear in reference (d), Part III. For the title of a file label, any abbreviation that will be understood by the custodian of the file may be used. For the disposition instructions, use abbreviations listed below. See figure 2-1 for sample label.

COFF - cutoff, cut off
Dest - destroy
FRC - Federal Records Center
PERM - permanent
PIF - place in inactive file
ROB - retain on board
Ret - retire
Trf - transfer
WNRC - Washington National Records Center

File #	File Title	Year of accumulation
12610.1	Time and Attendance	(98)
COFF 31 Dec 98, PIF, Dest Jan 04 (or After GAO audit, whichever is sooner)		
Disposition instructions		

Figure 2-1. Sample label showing the four elements of a file label.

(4) If there are several folders under one number, only the label on the first folder of the series must show all of the required label information. Labels on the other folders under the same file number will show the file number, a brief identification of material in the folder and (if applicable) the year of the file.

(5) When one or more file containers have records with the same file number, posting the file number and other information to each folder label or document is not required. The documents in files of this volume usually bear a distinctive identification (for example, the name on a personnel records jacket or financial data records folder, the number on a voucher, contract number, law enforcement and counterintelligence case files, and so forth). In these instances,

only the label on the first folder of the series and the label on the first container must show the required label information. Remaining folders (“dummy”), drawers, or other containers need only be identified by the title, number, or other feature identifying the contents. See figure 2-2.

Figure 2-2. Sample label entries and use of “dummy” folder

(6) No disposition is shown on labels for containers with two or more record series because it varies among the several record series stored in the container. See figure 2-3 for sample labels. The label entry for containers with only one record series, and holding all of that record series, is identical to the folder label. The label entries for containers with only part of one record series show which part of the records are stored within the container. In figure 2-3, the “(A thru L)” and “(M thru Z)” represent an alphabetical file arrangement. If files are identified numerically use numbers instead of letters.

12290-12990.2a(1) (98)	5580.4a(1) Criminal Investigative (98) ACTIVE COFF as case closure, ret to NCIS
Sample label entry for container with two or more record series.	Sample label entry for container with only one record series.
5580.4a(1) Criminal Investigative (98) Reports (A thru L) INACTIVE COFF 31 Dec 98, Dest Jan 00	5580.4a(1) Criminal Investigative (98) Reports (M thru Z) INACTIVE COFF 31 Dec 98, Dest Jan 00
Sample label entries for containers with only part of one record series.	

Figure 2-3. Sample file container labels

3. Applying Disposition Instructions

a. Disposition standards

(1) For most records the file disposition gives only the generic retention period (that is, destroy after 2 years, destroy after 5 years, permanent, and so forth). In dispositions like these, use table 3-1 to determine and apply the exact cut off, transfer, retirement, and disposition dates.

(2) For some records the file disposition also gives specific instructions for cut off, transfer, retirement, or establishment of inactive files, for example, "Permanent. Place in inactive folder (PIF) on completion of next inspection and cut off at the end of that year." In this example, the file remains among the currently used office files for however long it takes for the next inspection to occur. When the next inspection does occur, the file gains definite disposition instructions. At the end of the year in which the inspection occurred, the file is separated from the active files or "cut-off" and placed in a folder with the appropriate "permanent" disposition instructions on the label. This record will be transferred to the FRC after the proper period of time. See paragraph 3c(1) for more information on "time-event" dispositions.

b. Files cut off. Files with permanent retention or retention of a specific number of years are cut off at the end of the year in which action on the record has been completed. The retention period does not begin until the records have been cut off. Files with a continuing type of disposition, such as "Destroy when no longer needed for current operations," are not cut off.

Review them annually, and remove and destroy individuals records within such files when no longer needed.

c. Disposition instructions. There are three types of disposition instructions based on “time,” “event,” and “time-event.”

(1) With a “time” disposition, a record is cut off at the end of the month for a 30-day disposition, at the end of the quarter for a 3-month disposition, semiannually for a 6-month disposition, or at the end of the year for a 1-year or more disposition, held for the specified period, and then destroyed. All such records which accumulate during the course of the year in which the files are developed are cut off at the end of the month, quarter, or year, and then the specified retention period begins.

(2) With an “event” disposition, the record is destroyed upon or immediately after the specified event occurs. There is no waiting period as with the time disposition. As an example, consider the disposition instruction “Destroy after all corrections have been made and processed.” When all corrections have been made and processed, remove the document from the file and destroy it. The disposition on the file label would read, “Destroy when all corrections have been made and processed.”

(3) With a combination “time-event” disposition, a record is disposed of a certain period of time after an event takes place.

(a) This disposition requires the creation of two folders, ACTIVE and INACTIVE. The ACTIVE folder label does not show a year of accumulation, because it contains (in the example given above) all records of a case that has not yet been completed. It is in the “event” phase of the disposition, and it may be several years before the case is completed. Once a case is completed, the information is moved to the INACTIVE folder. This folder label does show a year of accumulation, because the information is now in the “time” phase of the disposition. The INACTIVE folder need not be created until the “event” phase of the disposition has occurred and the “time” phase is starting.

(b) The event is the trigger that causes the record to become inactive. It is then cut off at the end of that year, held for the specified time period, then disposed of. For example, with the disposition instruction “Destroy 2 years after close of case,” the record will remain in an ACTIVE file until the case is closed. At that time, move it from the ACTIVE to the INACTIVE file. The entire INACTIVE file will be cut off at the end of the year, held for 2 years, then destroyed. The ACTIVE file label would read, “ACTIVE. PIF on close of case.” The disposition on the inactive label will read, “INACTIVE. COFF 31 Dec 99, Dest Jan 02.”

(4) See table 3-1 for examples of disposition and label entries.

d. Deviations from disposition instructions. The Archivist of the United States must approve deviations from disposition instructions provided in reference (d). Letter requests for deviations will be sent by field activities via their Region to RMPO at BUMED. RMPO will evaluate the request to determine whether an exception is appropriate or whether the disposition instructions in the applicable file number should be changed. RMPO will forward valid requests to CNO (DNS-5). RMC requests will include the following:

(1) The file number and a brief description of the records involved.

(2) Justification, consisting of evidence of specific need for the records and information on their continuing administrative, legal, or fiscal value to the United States Government.

(3) The physical location of the records, including information on whether the records have been (or will be) transferred to a FRC.

e. Changes to retention periods. Frequently, retention periods change because of statutory, legal, financial, or administrative requirements. If a change increases the retention period, use the new retention period for all records, both active and inactive, under that file number. This applies no matter when the records were created or where they are maintained. If retention period is decreased or changed from permanent to a temporary period, apply the new schedule to all current records. In applying decreased retention schedules to inactive records, consider cost effectiveness and efficiency. If a decreased schedule would take a major effort to apply and storage space is not an issue, you may keep the records for the longer retention period.

f. Records disposal.

(1) Unclassified records authorized for destruction will be:

(a) Destroyed in accordance with local policy.

(b) For exposed photographs and certain microfilm that contains precious metals, dispose of under the DoD Precious Metals Recovery Program.

(2) Destroy FOUO records per reference (h) and classified records per reference (g).

Table 3-1 Disposition Standards.

	Abbreviated Disposition Instructions	Full Disposition Standard	Disposition Instructions on the File Label
1	Destroy after 1 month	Cut off at the end of the month; retain on board (ROB) 1 month in the current files area; then destroy.	COFF 31 Jan 98, Dest Mar 98 COFF 28 Feb 98, Dest Apr 98 COFF 31 Mar 98, Dest May 98 COFF 31 Apr 98, Dest Jun 98
2	Destroy after 3 months	Cut off at the end of each quarter; ROB 3 months in the current files area; then destroy.	COFF 31 Mar 98, Dest Jul 98 COFF 28 Feb 98, Dest Apr 98 COFF 31 Mar 98, Dest May 98
3	Destroy after 6 months	Cut off twice a year, according to the CY or FY; ROB 6 months in the current files area; then destroy.	CY: COFF 30 Jun 98, Dest Jan 99 or COFF 31 Dec 98, Dest Jul 99 FY: COFF 31 Mar 98, Dest Oct 98 or COFF 30 Sep 98, Dest Apr 99
4	Destroy after 1 year	Cut off at the end of the CY or FY; ROB for 1 year in the current files area; then destroy.	CY: COFF 31 Dec 98, Dest Jan 00 FY: COFF 30 Sep 98, Dest Oct 99
5	Destroy after 2 years	Cut off at the end of the CY or FY; ROB for 2 years in the current files area; then destroy.	CY: COFF 31 Dec 98, Dest Jan 01 FY: COFF 30 Sep 98, Dest Oct 00
6	Destroy upon occurrence of a specific action or event	Destroy when superseded or obsolete. Destroy when no longer needed for current operations	Destroy when superseded or obsolete. Destroy when no longer needed for current operations.
7	Destroy a certain time period after occurrence of a specific action or event. (See note)	Destroy 2 years after transfer or separation of individual. Place in INACTIVE file on transfer or separation of individual; cut off INACTIVE file at end of year and ROB 2 years in current files area; then destroy	Example for a 2-year time-event file: ACTIVE: PIF after transfer or separation of individual INACTIVE: COFF 31 Dec 98, Dest 01
8	Destroy after 3 years	Cut off at the end of the CY or FY; ROB for 3 years in the current files area; then destroy.	Example for a 3-year file: CY: COFF 31 Dec 98, Dest Jan 02 FY: COFF 30 Sep 98, Dest Oct 01
9	Destroy after 5 or more years (but not PERMANENT records) NOT SERVICED BY LOCAL STORAGE (LSA)	Cut off at the end of the CY or FY; ROB for 2 years in the current files area; transfer to the servicing Federal Records Center (FRC), where the file will be held until the total retention period has expired, then destroy.	Example for a 5-year file: CY: COFF 31 Dec 98, Trf Washington National Records Center (WNRC) Jan 01, Dest Jan 04 FY: COFF 30 Sep 98, Trf WNRC Oct 01, Dest Oct 03
10	PERMANENT Not serviced by LSA.	Cut off at the end of the CY or FY; ROB for 2 years in the current files area; and then retire to the servicing FRC.	CY: COFF 31 Dec 98, Ret WNRC Jan 01, PERM FY: COFF 30 Sep 98, Ret WNRC (Oct 00, PERM
11	Destroy after 4, 5, 6, or 7 years Serviced by LSA.	Cut off at the end of the calendar or fiscal year; ROB for 3 years in the current files area; then retire to the LSA; hold until total retention period expires; then destroy.	Example for a 4-year file: CY: COFF 31 Dec 98, Ret LSA Jan 02, Dest JAN 04 FY: COFF 30 Sep 98, Ret LSA Oct 01, Dest Oct 03
12	Destroy after more than 7 years (but not PERMANENT records). Serviced by LSA.	Cut off at the end of the calendar or fiscal year; ROB for 3 years in the current files area; then retire to the LSA; hold for 1 year; then transfer to the servicing FRC, where they will be destroyed when the retention period expires.	Example for a 10-year file: CY: COFF 31 Dec 98, Ret LSA Jan 01, Trf WNRC Jan 02, Dest Jan 2009 FY: COFF 30 Sep 98, Ret LSA Oct 00, Trf WNRC Oct 01, Dest Oct 2008
13	PERMANENT Serviced by LSA.	Cut off at the end of the CY or FY; ROB for 2 years in the current files area; then retire to the LSA; hold for 1 year; then transfer to the servicing FRC.	CY: COFF 31 Dec 98, Ret LSA Jan 01, Trf WNRC Jan 02, PERM FY: COFF 30 Sep 98, Ret LSA Oct 00, Trf WNRC Oct 01, PERM

Note:

For disposition standard 7, apply appropriate standard in rules 8 through 13 if longer retention periods are specified.

4. Reference Procedures

a. Records retrieval. The procedures in this section are designed to provide rapid and efficient files reference services.

b. Submission of requests. Requests to charge out files shall be in memorandum format. The following information is needed to locate and charge-out material:

(1) SSIC and serial number identification of material and file classification number, if known.

(2) Name of writer (organization or individual).

(3) Date of the document (specific or approximate).

(4) Requester's name, organization, location, and telephone number.

c. Charge-out record. A charge-out record will be made and substituted for documents removed from a file for reference purposes.

Table 3-1
Disposition standards—Continued.

Notes:

1. For rule 7, apply appropriate standard in rules 8 through 13 if longer retention periods are specified.

4. Reference Procedures

a. Records retrieval

The procedures in this section are designed to provide rapid and efficient files reference services.

b. Submission of requests

Requests to charge out files may be in memorandum format or the form listed in paragraph 4-3, below. The following information is needed to locate and charge-out material:

(1) SSIC and serial number Identification of material and file classification number, if known.

(2) Name of writer (organization or individual).

(3) Date of the document (specific or approximate).

(4) Requester's name, organization, location, and telephone number.

c. Charge-out record

A charge-out record will be made and substituted for documents removed from a file for reference purposes.
