Internship Program Admissions

Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on intern selection and practicum and academic preparation requirements:

The internship has two overarching aims. The first is to train psychologists with intermediate to advanced competency for entry level, generalist practice in health service psychology. The second is to train psychologists who are competent with the knowledge and skills required to practice health service psychology effectively within the military. Training stresses exposure to multiple theoretical orientations and techniques. Rotations include Adult Outpatient Mental Health/Psychological Assessment, Health Psychology, Inpatient Mental Health/Emergency Psychiatric Services, an operational rotation focused on Navy service members called Mental Health Operational Outreach Division, and an operational rotation focused on U.S. Marines called Marine Corps Mental Health.

Does the program require that applicants have received a minimum number of hours of the following at time of application? If Yes, indicate how many:

Total Direct Contact Intervention Hours	No		Amount: N/A
Total Direct Contact Assessment Hours	No		Amount: N/A

Describe any other required minimum criteria used to screen applicants:

1. U.S. citizenship required.
2. Applicants must meet all age, security background check, and medical requirements for commissioning as officers in the United States Navy. (AGE LIMIT: No more than age 41 at the time of commissioning).
3. APA-accredited doctoral program in clinical or counseling psychology required.
4. Comprehensive examinations passed by APPIC application deadline.
5. Dissertation proposal approved by APPIC ranking deadline.
6. Given the predominantly adult focus of the Navy internship, and of Navy Psychology in general, we specifically seek applicants with practicum experience in generalist clinical evaluation, assessment and psychotherapy with adults. Some experience with adults with major psychopathology is desirable but not mandatory. Applicants with minimal experience with adults, or with adult experience only in narrowly focused specialty areas such as neuropsychological assessment, would be at a significant disadvantage in our review.
