NBIMC NEWSLETTER

OCTOBER 2021

Awareness on D-2 deficiency

Dz's are orders that were received by CDD but specimens have not arrived yet. All of the shipments to CDD are FedEx Overnight. If you notice that a package is not delivered by 9:00 am EST the following morning, please let Erika San Miguel from CDD know the FedEx tracking number, and she can open a case on it ASAP for FedEx to verify. Due to increased issues with Fed Ex, CDD started watching the packages on the FedEx website that have delays to ensure your packages arrive on time and safely.

Department Head
Phone: 301-295-6590
Bldg 17B, 3rd floor, Suite 3G

MHS GENESIS: Coming Soon to a Hawaii MTF Near You

On September 25, 2021, the Hawaii Military Health System, consisting of Tripler Army Medical Center, Naval Health Clinic Hawaii, Desmond T. Doss Health Clinic, and 15th Medical Group, has transitioned to the Department of Defense's new electronic health record, MHS GENESIS.

Now fully implemented, MHS GENESIS will provide a single health record for service members, veterans, and their families that can be accessed securely 24/7 from any electronic device. The new system offers enhanced, secure technology, integrating inpatient and outpatient health records across the continuum of care from the point of injury to the military medical treatment facility. Eventually MHS GENESIS will be used throughout the Department of Defense, offering a single electronic health records system servicing all military branches.

The MHS GENESIS Patient Portal has replaced TRICARE Online. Starting September 25, patients will be able to utilize the Patient Portal to view their electronic health records; exchange secure messages with their health care team; schedule appointments; request prescription renewals; review clinical notes, referrals, and lab results; and much more. To learn more, visit [HERE](#)

CDD will be open on Monday, October 11th for Columbus / Indigenous People day

Happy Halloween
from the NBIMC Staff

Navy Bloodborne Infection Management Center

Mission

The Navy Bloodborne Infection Management Center (NBIMC) provides leadership and expertise to ensure mission readiness and to support the National Military Strategy. We oversee the administration and aid in the development of policies concerning the Human Immunodeficiency Virus (HIV), Hepatitis B, and Hepatitis C screening for the DON, as directed by BUMED for the Navy Personnel Command (NAVPERS).
