

# HIV

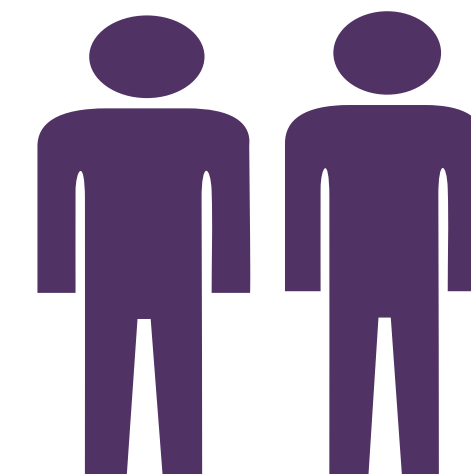

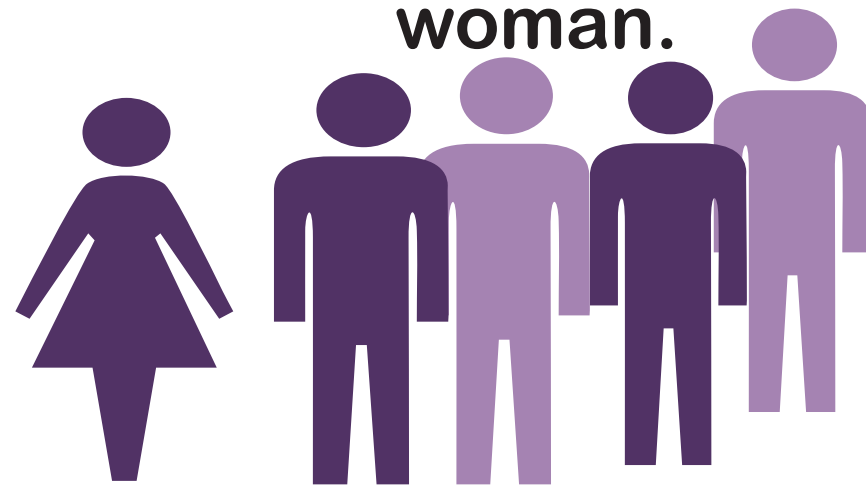

*What if there was a pill? There is...*

## HIV happens...

2

...every 2 days,  
another active duty  
member  
is diagnosed with HIV.

...to women:  
in the U.S., about 1 of 5 people  
that got HIV last year is a  
woman.

...to men: Men who have unprotected sex with men are at  
highest risk of getting HIV.  
Men who have unprotected sex with women can also get HIV.

## HIV PrEP pills can reduce risk by over 90%....

### HIV medicine

### Pre-Exposure Prophylaxis (PrEP)

can greatly reduce your risk of getting HIV.

You can take one pill each day - it's called PrEP.

- or -

You can take HIV pills after an exposure - BUT you must  
start within 72 hrs - it's called PEP.

Ask if PrEP or PEP are right for you.
