We have revamped our Tri-Service DRSi Surveillance Webinars for CY 2022. We will no longer have monthly sessions. The new format will include three Mini Conferences held throughout the year that will take place in March, June, and September. The Mini Conferences will be held once on the scheduled day and recorded. The presentation slides and or video recordings will be shared on our [Navy DRSi Training page](#). The upcoming session ‘Good DRSi Reporting & Best Practices’ to be held on March 29, 2022 at 1100ET will be our first, we welcome feedback on the design and topics of these sessions.

Reporting Tip of the Month

Don’t wait to report that outbreak! Outbreaks should be reported as soon as they are suspected per BUMED INST 6220.12C. Don’t wait for laboratory results before reporting the outbreak. If you are actively looking for cases, seeking causes of illness, and/or instituting control measures, report that outbreak now! To learn more see our [Outbreak Fact Sheet](#).
