# List of Reportable Medical Events

What every Navy Medical Department should know

- Reportable Medical Events are diseases and conditions of public health significance due to their potential for prevention and/or mission degradation
- Per BUMED INST 6220.12, Navy Medical Department personnel are responsible for reporting Reportable Medical Events
- Local Preventive Medicine staff will report the event through the Navy's Disease Reporting System internet (DRSi)
- If you diagnose any of these events listed, notify your local Preventive Medicine office

**NAVY AND MARINE CORPS PUBLIC HEALTH CENTER**  
PREVENTION AND PROTECTION START HERE
