

**REGISTER**  
FY21 Epi-tech Training

- **Registration is required:**
  - Register at: <https://tiny.army.mil/r/Qdo4/EpiTechFY21>
  - Log in with CAC, or follow prompts to Request access/Logon ID
  - Contact your service surveillance hub to receive monthly updates and reminders
- **Attendance:**
  - Please enter your full name/email/location into the DCS chat box to the left, or email your service hub
  - An attendance confirmation will be sent to your email; if you do not receive this message within 3 days, please contact your service hub
- **Reminder:**
  - Mute your phones by pressing the mute button or 0
  - DO NOT press the “hold” button as the rest of the conference will hear the hold music

## FY21 Epi-Tech Surveillance Training

Thursday, October 1, 2020 - Thursday, September 30, 2021  
DCS, Aberdeen Proving Ground, MD

### *Provided By*

U.S. Army Medical Command

<u>Activity ID</u>	<u>Course Director</u>	<u>CME Planner</u>
2020-0845	John Ambrose	Mimi C. Eng

### **Accreditation Statement**

The U.S. Army Medical Command is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

### **Credit Designation**

The U.S. Army Medical Command designates this Live Activity for a maximum of 5 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**This is a required handout. It must be disseminated to each learner prior to the start of the activity.**

## Statement of Need/Gap Analysis

**The purpose of this CME activity is to address the identified gap(s):**

1. Disease identification - Verification of disease by established case definitions have been utilized by the local health departments, Centers for Disease Control and Prevention, World Health Organization, and the Department of Defense. With the every changing list of reportable medical events and new emerging infections, case definitions change rapidly. Army epidemiologist conduct verification studies that monitor the efficiency of reporting by local public health experts and have concluded that completeness percentages for reportable medical events range as low as 35% for select diseases.
2. Outbreak reporting - Recent evidence have demonstrated that outbreak reporting and communication between public health agencies is poor. In fact, the Army failed to report six outbreaks in the DRSi between June 2016 and September 2016.
3. Surveillance techniques - Surveillance of common communicable diseases continues to be a problem among local MTFs. In fact, cases of campylobacter were not investigated in 2015 for PACOM MTFs, while 2016 cases of salmonella were not investigated. Civilian public health agencies are required to conduct investigations into all reportable medical events. However, DoD facilities often do not take initiative to conduct this investigation.

## Learning Objectives

1. Based on case presentation, enhance your ability to improve case finding and surveillance practices within your local MTF.

## Target Audience / Scope of Practice

**Target Audience:** The intended audience for this educational activity includes preventive medicine physicians, community health nurses, public health nurses, and epidemiology technicians.

**Scope of Practice:** This activity will improve the performance of preventive medicine personnel who conduct surveillance activities in inpatient and outpatient settings.

## **Disclosure of Faculty/Committee Member Relationships**

It is the policy of the U.S. Army Medical Command that all CME planning committee/faculty/authors disclose relationships with commercial entities upon invitation of participation. Disclosure documents are reviewed for potential conflicts of interest and, if identified, they are resolved prior to confirmation of participation.

### **Faculty Members**

- Bylsma, Victoria - No information to disclose.
- Gillooly, Paul - No information to disclose.

### **Committee Members**

- Ambrose, John - No information to disclose.
- Bowman, Wendi - No information to disclose.
- Bylsma, Victoria - No information to disclose.
- Constantino, Joycelyn - No information to disclose.
- Diaz, Rolando - No information to disclose.
- Eng, Mimi - No information to disclose.
- Kebisek, Julianna - No information to disclose.
- Riegodedios, Asha - No information to disclose.

## **Acknowledgement of Commercial Support**

There is no commercial support associated with this educational activity.

# Objectives:

1. Define what is risk communication.
2. Describe what are the goals of risk communication.
3. Describe risk communication failures and why they matter.

## Health Risk Communication Workshop 2017

How to Plan and Conduct Communications with Any Stakeholder (Internal or External) on Issues (Public Health Emergencies, Occupational Health, Environmental and Others) that can Impact Your Organization

**Effective Communication is critical –**

- **During Health and Environmental Responses**
  - Disease and Cancer Clusters
  - Pandemics
  - Weather Event Disasters
  - Chemical Releases
  - Terrorist Attacks
  - Fires and Earthquakes
- **To Sustaining the Mission When Situations have Consequences –**
  - Economic
  - Social, Cultural
  - Environmental
  - Political
  - Public Health

**Communications can mean the success or failure of an operation, regardless of –**

- Technical Input
- Funding
- Time and Effort

**Successful mission execution and sustainment requires effective communication that is –**

- Strategically planned
- Prepared for
- Integrated into all activities

**Applying Risk Communication principles is particularly imperative in situations involving:**

- **Negative emotions such as distrust, anger or fear**
- **Misperceptions and misunderstanding of science, data and facts**
- **Stakeholder agendas that may be personal, economic, political, social, historical or cultural**

events  
fires earthquakes  
chemical releases  
terrorist  
attacks  
personal agendas  
media  
realism

- 1 Day Media (Optional)
- High Level Interactivity – Role Playing

# Risk Communication

- Risk is a **science**
- Communication is **social**
- Risk Communication is a **Social Science**

# Engaging the Public – A bad idea?

- It means having to explain what we do and why...
- It means learning how to listen & collaborate w/people who see the world differently from us
- It means developing a modicum of awareness of how society works
- We run the risk of alienating the public, not because they didn't understand the science, but because scientists didn't understand people

# What is Risk Communication?

## Then...

A science-based approach for communicating effectively in ...

- high concern,
- low trust,
- sensitive or
- controversial situations

- Biology (Age) Barriers

# Can you answer these 3 Questions comfortably?

1. What did you know?
2. When did you know it?
3. What did you do about it (and **how fast**)?

**Lawyers and the Media already know the answer before they ask you.**

*It's rarely the event itself rather the cover-up that destroys the person and/or organization*

## Paterno knew

The revered coach and top Penn State officials covered up allegations of sex abuse to protect the school, an investigation concludes.

GENE J. PUSKAR | THE ASSOCIATED PRESS

By Amy Shipley | *The Washington Post*

Four of Penn State University's most powerful leaders, including head football coach Joe Paterno and President Graham Spanier, covered up allegations of sexual abuse by an assistant coach because they were concerned about negative publicity, a team of investigators concluded in a report released Thursday after an eight-month inquiry.

Confronted with reports that Jerry Sandusky lured boys to the State College campus, where he sexually abused them, Penn

IMPROVING READINESS THROUGH PUBLIC HEALTH ACTIONS

# Storytelling: Hard-Wired in Humans

- Began tens of **thousands** of years ago
- Still addicted to **story**
- Instinctive compulsion to witness, comprehend, **explain**, identify with and recoil from everything in terms of **story**
- A beginning, a middle and an **end**

# BLUF = “*Bottom Line Up Front*”

- Commonly used term in U.S. Military writing.
- Can also be used in conversations and interviews.
- Routinely seen in executive summaries in reports, subject lines in e-mails
- BLUF model used to keep conversation or answers to questions concise and focused on the immediate topic, in order to help a person talk less.
- Ensure the purpose of plans are kept in mind, decision-maker support is more readably attainable, and measurement of impact may more easily and accurately be assessed.
- In **technical writing**, BLUF is considered an essential skill.
- ***The crowd doesn't care about the windup; the crowd wants to see the pitch.***

“The plural of anecdote is not data.”

Find the Answers Hidden in  
Your Data

**NAVY MARINE CORPS PUBLIC HEALTH CENTER**  
IMPROVING READINESS THROUGH PUBLIC HEALTH ACTIONS

Risk = Probability x Magnitude

Risk = Hazard + Outrage

Risk = OMG x WTF

- Let's just educate them, convince them they are wrong...
- Different risk concept or paradigm
- Can't talk science until validate their concerns
- Risk is inherently subjective
- The public has a broad conception of risk, qualitative and complex, that incorporates considerations such as **uncertainty, dread, catastrophic potential, controllability, equity, risk to future generations**, and so forth into the risk equation.

Risk  
危機  
Danger Opportunity

“Risk professionals see ‘risk’ as ‘probability x magnitude’, whereas for most people risk means ‘outrage’.”

NAVY MARINE CORPS PUBLIC HEALTH CENTER  
IMPROVING READINESS THROUGH PUBLIC HEALTH ACTIONS

# What's Your Mission?

- Make sure your **actions/words** match your intent!

Escalate

De-escalate

# Fundamental Challenge

“There is virtually **no correlation** between the ranking of hazards by **experts** and the ranking of those same hazards by the **public**”

Just the  
facts,  
ma'am.

**NAVY MARINE CORPS PUBLIC HEALTH CENTER**  
IMPROVING READINESS THROUGH PUBLIC HEALTH ACTIONS

# Facts Vs Emotions

- “Facts are stubborn things,” President John Adams once said. “And whatever may be our wishes, our inclinations, or the dictates of our passions, they cannot alter the state of facts and evidence.”
- True, facts are stubborn things, **but...people are more stubborn.**
- In a battle between logic and emotion, **emotion will win over facts most of the time.**
- Researchers have estimated that **80% of decision-making is emotional**, and only **20% rational**. According to Kevin Roberts, CEO of advertising giant Saatchi and Saatchi, “Reason leads to conclusions. Emotion leads to action.”

# Use Open Ended Questions – 5 Ws

Take a cue from Journalists - Start your question with ....

**Who** was involved?

**What** happened?

**When** did it take place?

**Where** did it happen?

**Why** did that happen?

**How** did it happen?

## Trap: Don't take it personally

- The comment isn't about me. It was directed to me but it was not about me.

- Take your “personal” self out of the room, and bring back in only your “organizational” self. Now, are you ready to plan & execute the mission with any stakeholder?

If your mouth is  
open you are not  
learning.

- *Buddha*

- Listen

The average person talks  
**225** words per minute,  
but can listen to **500** words  
per minute

When you talk, you are  
only repeating what  
you already know. But  
if you listen, you may  
learn something new.

Dalai Lama

**NAVY MARINE CORPS PUBLIC HEALTH CENTER**  
IMPROVING READINESS THROUGH PUBLIC HEALTH ACTIONS

*No one ever  
got in trouble  
using their ears!*

*BIG EYES, and EARS and a small mouth*

We don't see things as they are ... we see things as we are

“It ain't what you don't know that gets you into trouble.  
It's what you know for sure that just ain't so.”

**NAVY MARINE CORPS PUBLIC HEALTH CENTER**  
IMPROVING READINESS THROUGH PUBLIC HEALTH ACTIONS

# What People Remember

30% - **HOW** it is said

10% - **WHAT** it is said

60% - **APPEARANCE**

**NAVY MARINE CORPS PUBLIC HEALTH CENTER**  
IMPROVING READINESS THROUGH PUBLIC HEALTH ACTIONS

## Fundamental Communication Shifts:

- 1) **Abundance** – Twitter, Facebook, Snapchat, Instagram, “Fake News”
- 2) **Avenues** - email, Facebook, Internet, Tumblr

Ignore These 2 Communication Shifts at Your Own Risk

STRATEGY By Ryan Jenkins, Published October 11, 2013 [Be the first to comment!](#)

Do you remember the process a decade or two ago, when you had to call someone? You had to walk over to the phone attached to the wall, wait a few minutes until your teenage daughter finished her call, refer to your physical address book for the phone number, dial in a rotating fashion....only to hear a busy signal. You wait 5 minutes, say a prayer and then try again and again and again until you finally speak to someone only to find out the individual you're trying to reach is not present to take the landline call. Ugh! How did we ever do it?

Communication has been transformed in unparalleled ways since the introduction of the Internet, smartphones and social media.

**NAVY MARINE CORPS PUBLIC HEALTH CENTER**  
IMPROVING READINESS THROUGH PUBLIC HEALTH ACTIONS

# MIT Study: Lies travel faster on Twitter than the truth

- 126,000 stories tweeted millions of times between 2006 - 2017
- Lies (*fake news*) travels significantly **farther, faster (6x), deeper, and more broadly (35%)** than the **truth** in all categories of information
- False stories takes **10 hours** to reach 1,500 Twitter users, versus about **60 hours** for the **truth**.
- **True** stories almost never got retweeted to 1,000 people, but the top 1 percent of the false ones got to as many as **100,000** people.
- Potential to influence political, economic, and social well-being
