

NAVY BUMED OFFICE OF WOMEN'S HEALTH

Women's Health Provider Treatment Algorithms

The Office of Women's Health has developed **11 treatment algorithms** to aid healthcare providers in triaging common women's health conditions in remote settings. These tools will **help providers determine whether to treat or escalate** female patients to a higher level of care, thus increasing the quality and standardization of women's healthcare in operational settings.

AVAILABLE TREATMENT ALGORITHMS

- Contraception
- Emergency Contraception
- Irregular Bleeding
- Pelvic Pain
- Ruling out Pregnancy
- Vaginal Discharge
- Breast Concerns
- Menstrual Suppression
- Sexually Transmitted Infections
- Management of Breakthrough Bleeding on Hormonal Contraception
- Pap Testing/Routine Pelvic Examinations

ACCESSING THE ALGORITHMS
