

Navy and Marine Corps Specimen Submissions for Steroid Testing:

All Navy and Marine Corps units will forward specimens for steroid testing to Navy Drug Screening Laboratory, Great Lakes (NDSL GL).

Navy Drug Screening Laboratory
2500 Rodgers Street, Building 5501
Great Lakes, IL 60088-2952

Navy commands must request authorization for steroid testing from the NADAP at BUPERS. (See POC information below.)

Requests must be on command letterhead and should be included with the submitted specimen(s). The request must include the unit POC name, email and phone number.

Specimens submitted for steroid analysis will not be tested for the standard DoD drug test panel unless specifically requested by the submitting unit.

Specimens from each service member should be submitted in two separate bottles with a minimum of 60 milliliters (mL) in each (120 mL urine total) to ensure sufficient volume for testing at SMRTL. Ideally, the specimens should be from the same urine void and not two separate collection events.

NDSL GL will forward specimens to the Sports Medicine Research Testing Laboratory (SMRTL) for steroid testing.

Upon completion of testing, SMRTL will send the steroid drug test results to NDSL GL. NDSL GL will transmit steroid drug test results, via encrypted email (PKI), to the service POC below. The service POC will transmit the steroid test result to the submitting unit.
