

# Evidence-Based Services for Force Health

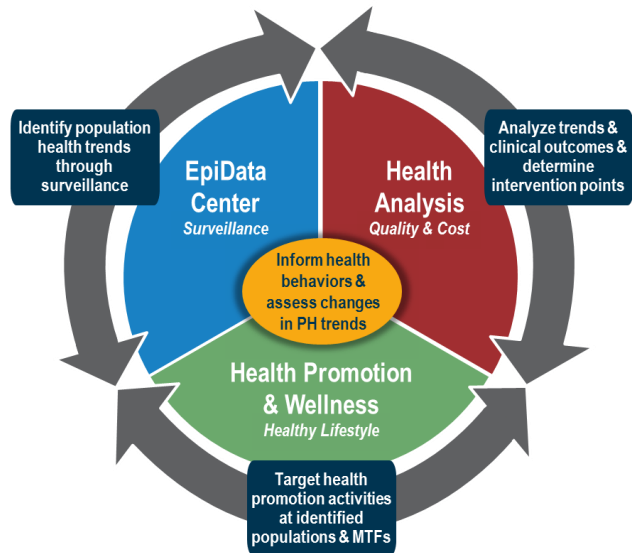

Health surveillance, epidemiology, analysis, and disease and injury prevention

# POPULATION HEALTH

We optimize and support Force Health Protection and Readiness by providing health surveillance services in support of the Navy's disease and injury prevention programs, analyzing clinical data, providing epidemiology study support, and assessing quality and availability of care. We also provide health promotion and wellness programs and services to prevent illness, enhance readiness, and promote healthy behaviors and lifestyles.

## Population Health Model

**DATA DRIVEN  
EVIDENCE BASED  
POPULATION ORIENTED**
