

NAVY NWU TYPE II AND TYPE III PERMETHRIN TREATMENT GUIDANCE

Approved methods of treatment:

- **Two methods of factory treatment**
 - Tumble application method
 - Proprietary spray method
- **Field application methods**
 - 40% liquid permethrin with 2gal handcan (NSN 6840-01-334-2666 lasts for 50 laundering)
 - IDA kit (NSN 6840-01-345-0237 lasts 50 laundering)
 - Aerosol (NSN 6840- 01-278-1336 lasts for 6 washings)
- Treatment by above methods affords protection beyond the untreated NWU Type II and III fabrics.
- Refer to the Armed Forces Pest Management Board's Technical Guide 36, "Personal Protective Measures Against Insects and Other Arthropods of Military Significance" to learn more about the DoD Arthropod repellent system to include treatment methods

Type II

Type III
