

Performance Checklist (PCL)

Clinical Skill: **Bleeding Control/Shock Management**

Circle One:

Initial Evaluation

Re-Evaluation

Command:

A. INTRODUCTION

Upon successful completion of this performance checklist, a Hospital Corpsman (HM) assigned to Budget Submitting Office (BSO) 18 Patient Care Facility or Reserve command will be able to treat hemorrhage, manage a patient with shock and document treatment on a live and/or simulated patient.

B. EQUIPMENT LIST: The primary evaluator is responsible for checking all of the equipment listed below are available and functional prior to the evaluation:

1. Live and/or simulated patient
2. Non-Sterile Gloves
3. Non-sterile gauze
4. Nasopharyngeal airway
5. Oropharyngeal airway
6. Oxygen tanks
7. Non-rebreather masks
8. Tourniquets
9. Warming layers
10. Pressure dressing
11. Hemostatic agent dressing/gauze
12. Spine board

2. Hospital Corpsman Manual, NAVEDTRA 14295 (series)
3. Hospital Corpsman Skills Basic, BUMED INSTRUCTION 1510.23 (series)

D. SAFETY PRECAUTIONS

1. Evaluators, evaluatees and visitors must comply with all general safety procedures that are posted.
2. Evaluatees may not take equipment out of the lab.
3. Evaluatees will follow universal precautions and wear proper BSI.

E. JOB STEPS

PERFORMANCE CHECKLIST (PCL)
BLEEDING CONTROL/SHOCK MANAGEMENT

Evaluee Instructions:

1. The purpose of this performance checklist is to evaluate the HM's ability to treat hemorrhage, manage a patient with shock and document treatment on a live and/or simulated patient.
2. The evaluee must attempt to perform each step and may be required to answer clarification questions from the evaluator.
3. The evaluee is not allowed to use the reference during the evaluation of this performance checklist.

Evaluator Instructions:

1. Evaluate one HM at a time. The primary evaluator needs to familiarize themselves with the performance checklist and how to use the rubric.
2. Study the performance checklist and become proficient in using the rubric.
3. Before starting the evaluation, answer evaluee's questions and make sure they understand what they are supposed to do. Once readiness has been established, evaluate the HM's performance using the rubric and checklist provided below.

F. STANDARD

SATISFACTORY PERFORMANCE: The evaluee must achieve a minimum passing score of 70% (33 points) of all parts, with no critical (*) items missed.

UNSATISFACTORY PERFORMANCE: Failure to achieve a minimum passing grade of 70% (33 points). Evaluee who demonstrate unsatisfactory performance will be remediated and/or counseled IAW Reference 3.

G. DIRECTIONS FOR SCORING

Evaluators will use the "Maximum Points Performance" description to determine if the evaluee has successfully demonstrated the "Event" listed in the rubric below and should receive 2 points. Evaluees that require prompting may receive a partial point score of 1 point if the event is not a "Critical" event. The "Partial Points" column will be blacked out on the rubric for all "Critical" events, these events are annotated with an asterisk on the checklist. For non-critical events, the evaluee will receive 0 points if they do not successfully complete the event after evaluator prompting.

PERFORMANCE CHECKLIST (PCL)
BLEEDING CONTROL/SHOCK MANAGEMENT

Rubric

Event	Max Points	Maximum Points Performance	Partial Points	Partial Points Performance	Failing Points
SCENARIO: THE PATIENT HAS ARTERIAL BLEEDING ON LOWER EXTREMITY OR UPPER EXTREMITY. THE EVALUATOR WILL DETERMINE THE SCENARIO					
TREAT A PATIENT WITH MASSIVE HEMORRAGE					
Take BSI precautions	2	Take appropriate body substance isolation (BSI) precautions		Critical	0
Direct pressure	2	Apply direct pressure to wound		Critical	0
Apply pressure dressing	2	Apply pressure dressing	1	Prompt required	0
Elevate injury above the level of the heart	2	Elevate injury above the level of the heart	1	Prompt required	0
Apply tourniquet	2	Apply tourniquet, if direct pressure is not sufficient		Critical	0
Assess and treat the patient for shock	2	Assess and treat the patient for shock		Critical	0
SCENARIO: THE PATIENT IS EXHIBITING SIGNS AND SYMPTOMS OF HYPOPERFUSION AND A SIGNIFICANT MECHANISM OF INJURY					
MANAGE A PATIENT WITH SHOCK					
Perform manual stabilization	2	Perform manual stabilization of the head and neck		Critical	0
Maintain open airway	2	Maintain open airway via head tilt chin lift or jaw thrust		Critical	0
Protect patient's airway via appropriate adjunct	2	Protect patient's airway via appropriate adjunct		Critical	0
Address any inadequate breathing issues	2	Address any inadequate breathing issues		Critical	0

PERFORMANCE CHECKLIST (PCL)
BLEEDING CONTROL/SHOCK MANAGEMENT

Event	Max Points	Maximum Points Performance	Partial Points	Partial Points Performance	Failing Points
Oxygen Therapy	2	Administer oxygen	1	Prompt required	0
C-collar	2	Apply cervical collar for neck stabilization	1	Prompt required	0
Log-roll	2	Perform log-roll of patient onto spine board	1	Prompt required	0
Immobilize and straps to spine board	2	Secure patient to spine board via head immobilizer and straps		Critical	0
Reassess tourniquets and critical interventions	2	Reassess tourniquets and critical interventions		Critical	0
Position the patient	2	Position the patient (Trendelenburg)	1	Prompt required	0
Cover	2	Cover patient with warming layers	1	Prompt required	0
Perform immediate transport	2	Perform immediate transport		Critical	0
Perform reassessment	2	Perform reassessment		Critical	0
Obtain vital signs	2	Obtain vital signs		Critical	0
Perform a detailed examination	2	Perform a detailed examination	1	Prompt required	0
Perform any minor interventions	2	Perform any minor interventions not previously performed	1	Prompt required	0
Document	2	Document the encounter	1	Prompt required	0

Actual Time Started: _____

Possible
Points Points
Awarded

TREAT A PATIENT WITH MASSIVE HEMORRAGE		
*Take appropriate body substance isolation precautions	2	
*Apply direct pressure to wound(s)	2	
Apply pressure dressing	2	
Elevate injury above the level of the heart	2	
*Apply tourniquet and mark time (if previous treatments fail to stop bleeding)	2	
*Assess and treat the patient for shock	2	
SUBTOTAL	12	
MANAGE A PATIENT WITH SHOCK		
*Perform manual stabilization of the head and neck	2	
*Maintain open airway via head tilt chin lift or jaw thrust	2	
*Protect the airway via adjunct	2	
*Address any inadequate breathing issues	2	
Administer oxygen	2	
Apply cervical collar	2	
Perform log-roll of patient onto spine board	2	
*Secure patient to spine board via head immobilizer and straps	2	
*Reassess tourniquets and critical interventions	2	
Position the patient (Trendelenburg)	2	
Cover patient with warming layers	2	
*Perform immediate transport	2	
*Perform reassessment	2	
*Obtain vital signs	2	
Perform a detailed examination	2	
Perform any minor interventions not previously performed	2	
Document the encounter	2
