U.S. Naval Hospital Guantanamo Bay

USNH Guantanamo Bay is a small, remote community-based facility with 260 employees providing healthcare for a population of approximately 5,500. The staff has earned the highest patient satisfaction rates among all military treatment facilities in the Navy, has earned the Navy Surgeon General’s Blue H Gold Star award four consecutive years and operates the only home health care program in the Navy. All services are provided with a patient and family centered focus.

MISSION
Keep the Navy and Marine Corps family healthy, ready and on the job.

VISION
The Navy and Marine Corps family has the best readiness and health in the world.

GUIDING PRINCIPLES
Honor the trust to provide the best care to those who defend our freedom.
Honor the “uniform” we wear.
Honor the privilege of leadership.

Join the Conversation:  NavHospGB
USNHGB provides basic, routine, primary, and urgent care to all residents and visitors to NSGB. The hospital does not have intensive care for newborns, children or adults, has limited dental care, blood products, pharmacy capabilities and imaging (x-ray/radiological) services. Medical travel insurance is highly recommended. Patients requiring a medical evacuation will be transported to the United States, which can cost on average $25,000 - $50,000 if travel insurance is not in place. All individuals receiving care will be billed for services unless covered by TRICARE (DoD beneficiaries). Individual patients are responsible for all costs not covered by insurance and the hospital is obligated to recoup 100 percent of billed costs.
