For all staff involved in aerosolizing procedures
Please make sure to wear N95 mask and eye protection in addition to standard PPE.

PLEASE BE SURE YOU CHECK YOUR N95 RESPIRATOR PRIOR TO EACH USE.
1. Do a visual inspection of your respirator and check for punctures or other abnormalities.
2. Everytime you don your respirator please conduct a seal test (couple your hands over your mask and take a quick deep breath in, then breathe normal and check for air leaking from your respirator). If you have leaks DO NOT USE.
3. Remember any changes such as weight gain/loss, pregnancy, dental, etc. contact safety for re-fit testing.

PLEASE REACH OUT IF YOU HAVE ANY QUESTIONS, 953 - 5826.

Aerosolizing procedures include:
- Intubation
- Extubation
- Nebulization
(list not all inclusive)
