Evidence-Based Services for Force Health
Health surveillance, epidemiology, analysis, and disease and injury prevention

POPULATION HEALTH

We optimize and support Force Health Protection and Readiness by providing health surveillance services in support of the Navy's disease and injury prevention programs, analyzing clinical data, providing epidemiology study support, and assessing quality and availability of care. We also provide health promotion and wellness programs and services to prevent illness, enhance readiness, and promote healthy behaviors and lifestyles.

DATA DRIVEN EVIDENCE BASED POPULATION ORIENTED

Population Health Model

- Identify population health trends through surveillance
- Analyze trends & clinical outcomes & determine intervention points
- Inform health behaviors & assess changes in PH trends
- Target health promotion activities at identified populations & MTFs
- Health Promotion & Wellness
  Healthy Lifestyle
- EpiData Center
  Surveillance
- Health Analysis
  Quality & Cost

Other services provided by Population Health:

**EPIDATA CENTER**
We are subject-matter experts in public health surveillance related to communicable diseases, drug resistant organisms, occupational and environmental epidemiology, behavioral health, and deployment-related health conditions. Our services include:
- Analysis of Threats to Public Health and Patient Safety
- Public Health Program Evaluation
- Public Health Applications Development and Sustainment
- Epidemiology Study Design

**HEALTH ANALYSIS**
We apply our clinical, epidemiological, and statistical expertise to deliver the evidence needed to align resources, measure effectiveness, and improve access to and quality of care. Our services include:
- Epidemiological Analysis
- Spatial Analysis
- Program Evaluation
- Process Improvement

**HEALTH PROMOTION & WELLNESS**
We deliver innovative and evidence-based health promotion and wellness programs and services that facilitate readiness and resilience, prevent illness and injury, hasten recovery, and promote lifelong healthy behaviors and lifestyles to include:
- Healthy Eating and Active Living
- Tobacco Free Living
- Reproductive and Sexual Health
- Psychological and Emotional Well-being
- Weight Management
