The Fagerstrom Tolerance Test for Nicotine Dependency allows physicians to classify smokers according to level of nicotine dependency and to identify those most likely to need nicotine replacement therapy (usually indicated by a score of 6 or above). The two most important questions are numbers 1 and 4 (Adapted from Fagerstrom KO, Heatherton TF, Kozlowski LT/ Nicotine addition and its assessment. *Ear Nose Throat J.* 1991; 69:763-765.)
